

Big Ben

*Floor Plans and maps
For Virtual table top or printing*

Big Ben

Big Ben is actually the nickname for the bell. These are maps of the Elizabeth Tower which holds the bell and the iconic clock. We will present the floors from top to bottom.

Up to the 7th floor there is a staircase you can use to ascend the tower. From the 7th to 9th there is a spiral staircase. The 10th floor is accessible by ladder, the 11th by a metal staircase.

VTT Settings: (each unit is 70 pixels)

Page Size: 12 units wide by 12 units high

Scale: 1 unit = 1 m (or 3 ft.)

Grid Size: 1 units

11th Floor - Aytron Light

This light is lit when the the commons or Lords are sitting.

10th Floor - Belfry

A maintenance walkway around the circumference of the floor allows for access to the bells themselves.

9th Floor - Link Room

So called because it links the bells (above) to the complex mechanical workings (below).

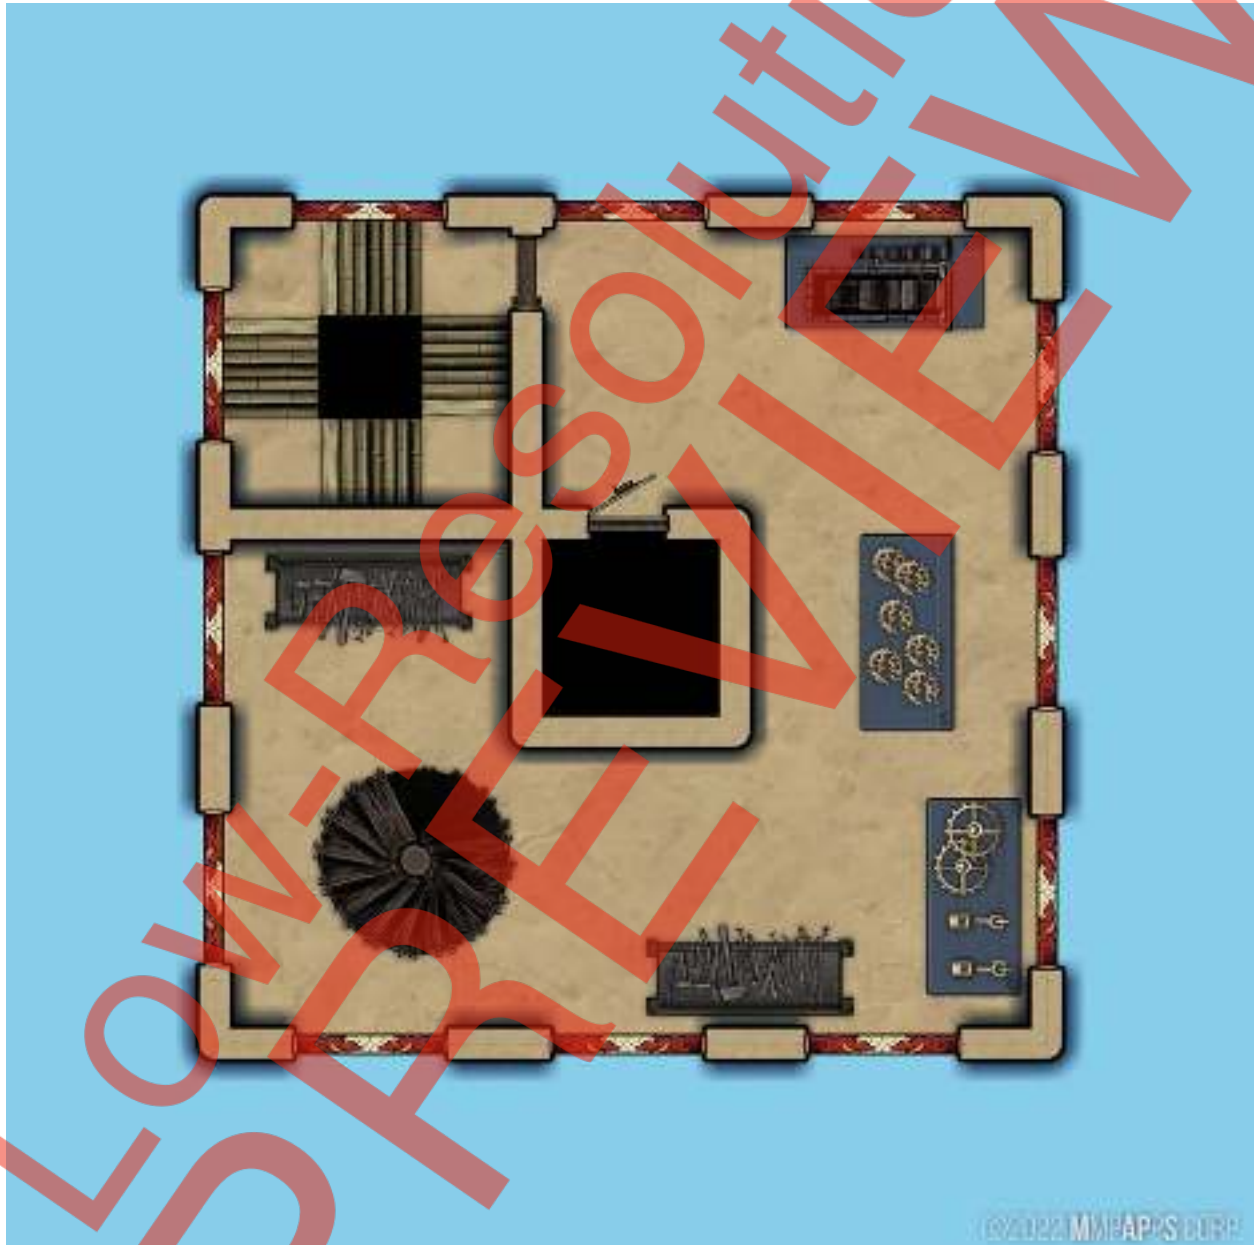

8th Floor - Clocks

Four massive clock faces are driven by complex mechanical workings all powered by simple pendulums.

7th Floor - Maintenance

The last floor accessible by the stairwell, this is where the complex clock mechanisms are maintained. Also starting on this floor the central shaft runs all the way down to the basement. In this shaft the heavy clock counterweights hang.

6th Floor - Storage

This is where spare parts for the complex clock mechanics are stored.

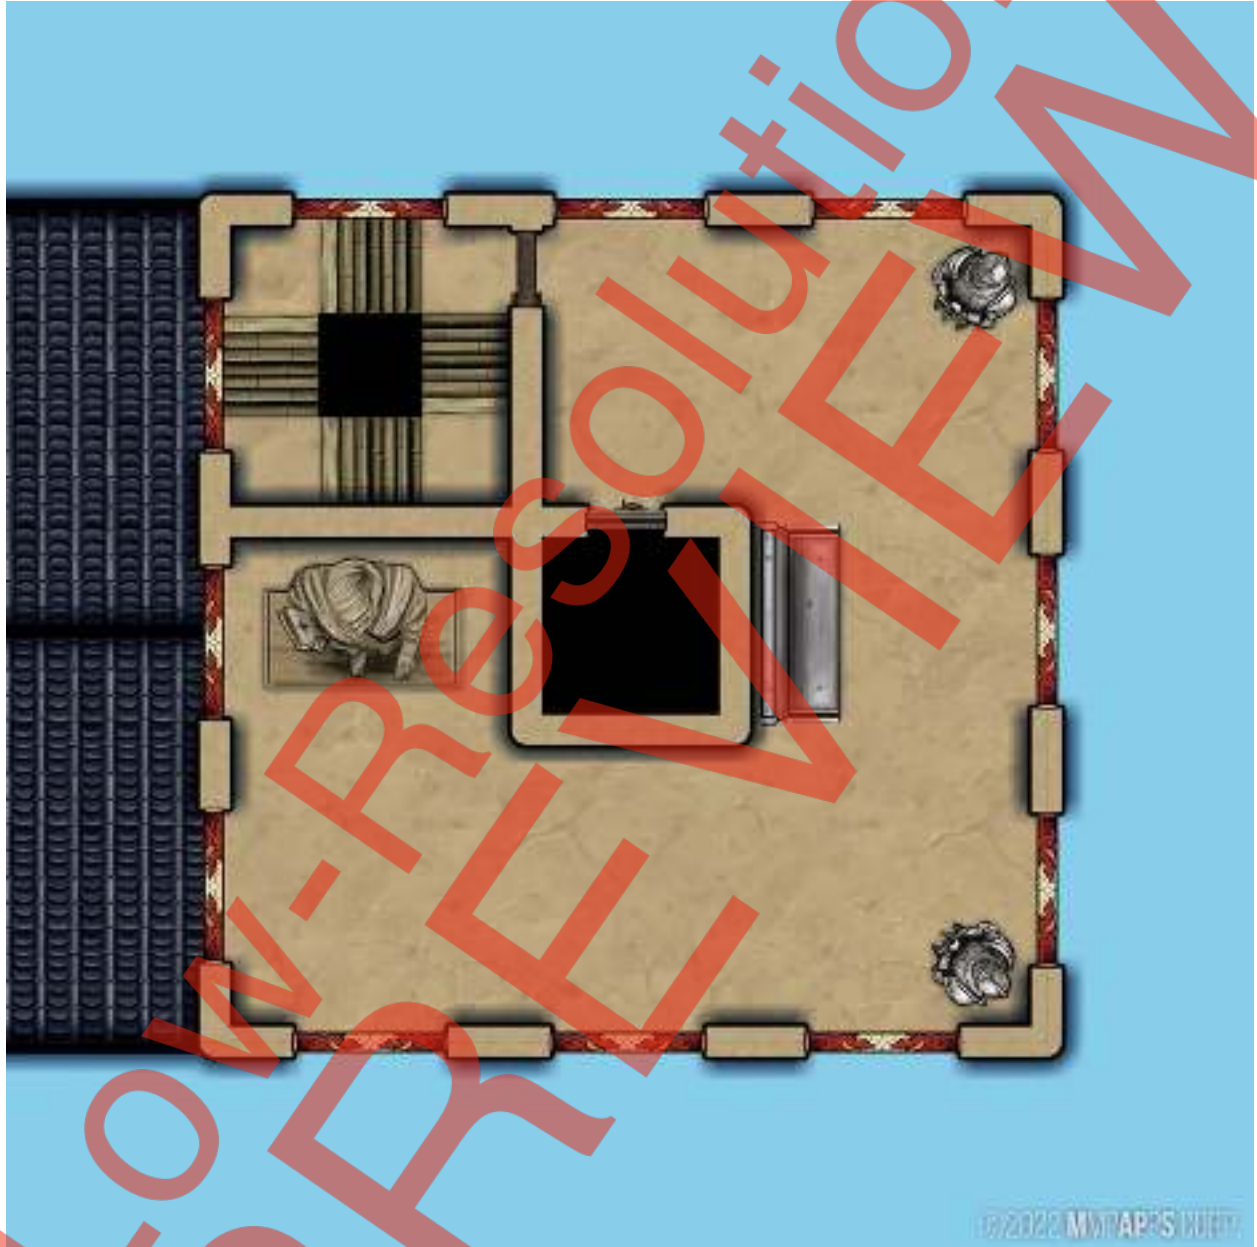

5th Floor

The last of the publicly accessible floors, here artifacts relating to history of the tower are displayed.

4th Floor

The first floor above the houses of parliament.

3rd Floor - Prison

This is where members of parliament who break the code of conduct are held. Note: It is not accessible from the tower staircase, only from the main parliament building.

2nd Floor

Publicly accessible.

1st Floor

Publicly accessible.

Ground Floor

The main public entrance to the tower. At this level the central shaft is filled with sandbags to absorb impact should one of the counterweights fall.

Basement

A coal burning furnace is found here. At this level the central shaft is filled with sandbags to absorb impact should one of the counterweights fall.

For each location, maps are provided for:

- With grid and without grid
