

CHROMATIC KOBOLDS

CHROMATIC KOBOLDS IS A MONSTER SUPPLEMENT FOR 5E THAT EXPLORES KOBOLD CULTURE THROUGH ITS MOST DEFINING obsession: dragons. Kobolds are opportunists, tunnelers, scavengers, and engineers, but above all they are imitators. Every warren believes it exists under the shadow of draconic greatness, and the higher a kobold rises within its hierarchy, the more loudly it claims to channel the power of a dragon.

The intent of this product is mechanical clarity and encounter variety without CR escalation. Kobolds are not meant to be individually dominant monsters. Instead, they are dangerous through preparation, numbers, traps, and coordination. This ladder progresses from the lowest labor caste through specialized battlefield roles, culminating in self-proclaimed draconic spellcasters who dramatically overestimate their magical importance.

The chromatic variants reflect kobold attempts to imitate the great dragons they worship. A kobold devoted to a red dragon builds explosive traps and boasts of fire magic. A blue kobold channels lightning theatrics. A green kobold turns to poison and deceit. A black kobold favors corrosive ambushes, while white kobolds embrace freezing hazards. These powers are real, but never as impressive as the kobolds believe.

Cultural depth, religion, and political structure are intentionally left open. Some warrens may genuinely serve a dragon. Others simply imitate draconic behavior through rumor and myth. Whether these kobolds are cultists, opportunists, or delusional imitators is left to the GM.

Use these stat blocks as tools. Whether a kobold warren is a nuisance infestation or a cunning trap network hiding beneath civilization is entirely up to you.
