

ELEMENTAL FORCES

LEMENTAL FORCES IS A MONSTER SUPPLEMENT FOR 5E THAT PRESENTS THE CLASSICAL FOUR ELEMENTS AS disciplined manifestations of planar power rather than singular creatures. Instead of relying on the single elemental stat blocks commonly found in the Monster Manual, this book provides four complete ladders of escalating elemental presence: Fire, Water, Air, and Earth.

The intent of this product is mechanical clarity and mathematical progression without unnecessary complexity. Each ladder follows a strict five-rung structure—Lesser, Elemental, Greater, Dominant, and Primal—progressing from CR 1 through CR 12. Abilities scale additively and symmetrically across all elements, ensuring that power increases through predictable structure rather than new subsystems or rule exceptions.

Every elemental obeys the same foundational law of polarity. Elementals are healed by damage of their own elemental type and are vulnerable to the damage of their opposing element. Fire opposes water, and air opposes earth. This relationship is consistent across the entire system and creates intuitive tactical counterplay during encounters.

Cultural lore, summoning traditions, and planar origins are intentionally minimal. These elementals may represent raw planar manifestations, ancient spirits of the world itself, summoned forces under mortal command, or natural disasters given form. Use these stat blocks as tools. Why the elements awaken is yours to decide.

FIRE ELEMENTALS

Fire elementals represent pure destructive heat and relentless expansion. They advance aggressively, radiating scorching heat that punishes enemies who remain too close. Their abilities emphasize pressure and displacement, forcing creatures away from the growing inferno surrounding them.

Encounters with fire elementals feel explosive and dangerous. Their heat fields gradually escalate the threat of remaining nearby, while their control abilities scatter enemies and break defensive lines. A fire elemental force feels like a spreading wildfire—violent, fast-moving, and impossible to ignore.

WATER ELEMENTALS

Water elementals embody relentless pressure and flowing momentum. Rather than scattering enemies, they pull creatures inward through crushing currents and freezing surges. Their battlefield presence feels like a rising tide that steadily overwhelms resistance.

Encounters with water elementals emphasize positioning and control. Their cold fields punish enemies who remain nearby, while their control abilities drag creatures deeper into the elemental surge. A water elemental force feels inevitable and encroaching, steadily tightening its grip on the battlefield.

AIR ELEMENTALS

Air elementals are manifestations of storm winds and violent atmospheric power. They move rapidly through combat, striking with lightning-charged force and controlling enemy positioning through powerful gusts.

Encounters with air elementals feel chaotic and dynamic. Their electrical fields punish creatures that remain close, while their control abilities hurl enemies across the battlefield. A force of air elementals feels like a raging storm—fast, unpredictable, and constantly shifting.

EARTH ELEMENTALS

Earth elementals represent mass, endurance, and crushing geological force. Unlike the other elements, they rely on immovable presence rather than speed or displacement. Their immense weight fractures the ground and pins enemies in place.

Encounters with earth elementals feel relentless and immovable. Their crushing fields punish creatures that remain nearby, while their control abilities halt enemy movement entirely. A force of earth elementals feels like a living landslide—slow, unstoppable, and devastating once it arrives.

Elemental Polarity. When this elemental would take fire damage from a source other than an elemental, it instead regains hit points equal to the damage dealt. This elemental is vulnerable to cold damage.

Elemental Nature. This elemental does not require air, food, drink, or sleep.

Elemental Body. The elemental's body is composed of concentrated fire. It has advantage on saving throws against effects that would push, pull, or knock it prone.

ACTIONS

Elemental Strike. *Melee Weapon Attack:* +5 to hit, reach 5 ft., one target. *Hit:* 18 (4d8) fire damage.

- This elemental moves directly toward the largest cluster of enemies and attacks the closest creature.
- It relies on durability and sustained damage rather than tactical movement.
- It does not retreat and represents a stable manifestation of elemental flame.

DOMINANT WATER ELEMENTAL

Huge elemental, neutral
