

FOREST DRUIDS

FOREST DRUIDS IS A 5E MONSTER SUPPLEMENT THAT PRESENTS WOODLAND DRUIDS AS TERRITORIAL GUARDIANS OF THE living canopy rather than generic nature spellcasters. Instead of treating druids as interchangeable wanderers, this book delivers a complete grove structure built around stealth, terrain control, and coordinated Wild Shape tactics.

Deep within ancient forests, where towering trees block the sun and the ground is thick with moss, roots, and hidden paths, these druids protect the oldest wilderness in the world. They guide those who respect the forest and relentlessly hunt those who threaten its balance.

What sets this supplement apart is complete usability at the table. Every druid includes fully integrated Wild Shape options, and every animal form is provided as its own ready-to-run stat block. No rule lookups. No page flipping. When a druid transforms, you already have everything you need.

Foxes move silently through leaf litter, hawks and owls patrol the canopy, and massive bears and elk embody the raw strength of the deep forest. These are not generic animals—they are druids in living forms, thinking tactically and fighting with purpose.

This supplement provides a complete woodland encounter toolkit:

- Six Forest Druids from initiate to archdruid
- Full stat blocks for every Wild Shape form used by the grove
- Seamless transformation play with no external references required

Whether defending a sacred grove or ambushing intruders beneath ancient trees, these druids turn the forest into an intelligent, living battlefield.
