

ICE DRUIDS

ICE DRUIDS IS A 5E MONSTER SUPPLEMENT THAT PRESENTS DRUIDS AS MASTERS OF THE FROZEN WILDERNESS RATHER THAN generic nature spellcasters. Instead of treating arctic druids as isolated survivors, this book delivers a complete circle structure built around endurance, battlefield control, and relentless pursuit across snow and ice.

Far from civilization, where glaciers grind mountains to dust and blizzards bury entire valleys, these druids draw their strength from cold, storm, and the unforgiving tundra. They guard frozen forests, protect sacred winter groves, guide migrating beasts, and hunt down those who threaten the balance of the deep north.

What sets this supplement apart is complete usability at the table. Every druid includes fully integrated Wild Shape options, and every animal form is provided as its own ready-to-run stat block. No rule lookups. No page flipping. When a druid transforms, you already have everything you need.

Arctic foxes move silently across the snow, snowy owls patrol the frozen skies, and massive polar bears embody the brutal strength of winter. These are not generic animals—they are druids in living forms, thinking tactically and using the environment to dominate the battlefield.

This supplement provides a complete arctic encounter toolkit:

- Six Ice Druids from initiate to archdruid
- Full stat blocks for every Wild Shape form used by the circle
- Seamless transformation play with no external references required

Whether defending a sacred glacier or stalking enemies through a blizzard, these druids turn the frozen wilderness into a relentless and intelligent battlefield.
