

INVISIBLE STALKERS

INVISIBLE STALKERS IS A MONSTER SUPPLEMENT FOR 5E THAT PRESENTS INVISIBLE STALKERS AS A MATHEMATICALLY SCALING assassination lineage rather than a single mid-tier elemental stat block. Instead of treating the invisible stalker as a one-bracket threat, this book expands the concept across thirteen escalating manifestations—each retaining the same core chassis while adding cumulative, disciplined hunting talents.

The intent of this product is controlled lethality and solo encounter viability without CR inflation. Each stalker preserves the fundamental air elemental identity—permanent invisibility, relentless pursuit, and focused violence—while scaling through predictable mathematical progression. No rung abandons prior abilities; each new manifestation adds to the assassination toolkit rather than replacing it.

Invisible stalkers are not skirmishers, not battlefield commanders, and not chaotic storm spirits. They are elemental assassins bound to a single quarry. Every action they take—movement, positioning, target selection, and even attacks against bystanders—is evaluated solely through the objective of killing that designated creature.

Their combat strategy is deliberate and disciplined:

- **Designation.** Upon summoning, a stalker is bound to one quarry. It always knows the direction of its target while on the same plane.
- **Approach.** It stalks patiently, choosing terrain, timing, and elevation to maximize isolation.
- **Disruption.** It scatters allies with controlled bursts of wind, pushes protectors out of formation, and relocates the quarry through forced movement rather than brute force.
- **Isolation.** It drags, pins, lifts, and strands its target away from support.
- **Execution.** It delivers concentrated burst damage only against the quarry, conserving force against others unless removing interference advances the mission.

At higher tiers, stalkers gain limited legendary mobility and control options—not to increase damage output, but to maintain pressure in solo encounters against coordinated parties. These legendary actions never add direct damage; they exist to reposition, disrupt, and isolate.

Cultural lore and motive remain intentionally minimal. Invisible stalkers may be summoned by mages, bound by ancient compacts, dispatched by elemental courts, or unleashed by accident. Their purpose is singular. They are wind given intent.

Use these stat blocks as precision instruments. The reason the air wants someone dead is yours to decide.
