

PHARAOHS

PHARAOHS IS A MONSTER SUPPLEMENT FOR 5E THAT PRESENTS THE RULERS, SERVANTS, AND GUARDIANS OF AN ANCIENT desert kingdom as a complete societal ladder rather than isolated NPCs. Instead of treating ancient Egypt as a backdrop populated only by mummies and gods, this book focuses on the living structure that builds, maintains, and defends royal tombs and sacred necropolises.

The intent of this product is mechanical clarity and encounter utility without excessive CR escalation. The ladder progresses from the laborers and attendants who maintain burial complexes, through scouts, guards, priests, and commanders responsible for protecting sacred ground, culminating in the living pharaoh whose authority governs both temple and army. These NPCs represent a functioning civilization whose tombs are defended long before any undead threat emerges.

Cultural lore is intentionally minimal. Whether these rulers govern a thriving desert kingdom, the remnants of an ancient empire, or a hidden necropolis civilization is left to the GM. Use these stat blocks as tools. Who the pharaoh rules, and why the tombs must remain sealed, is yours to decide.

EGYPTIAN TOMB CONSTRUCTS

EGYPTIAN TOMB CONSTRUCTS IS A MONSTER SUPPLEMENT FOR 5E THAT PRESENTS THE MAGICAL DEFENSES OF ANCIENT burial complexes as a structured construct ladder rather than isolated animated statues. Instead of relying on undead guardians or divine intervention, these tombs are protected by deliberate magical engineering: constructs created to labor, patrol, punish intrusion, and defend sacred chambers long after their creators have died.

The intent of this product is mechanical clarity and encounter variety without excessive CR escalation. The ladder progresses from small funerary constructs such as shabti servants and sacred vessels through increasingly formidable tomb guardians, culminating in colossal monumental defenders placed at the most sacred entrances of pyramids and royal burial sites. These constructs are designed to create layered defenses within tomb environments, forcing intruders to navigate traps, guardians, and increasingly powerful stone sentinels.

Cultural lore is intentionally minimal. Whether these constructs were created by ancient priesthoods, forgotten arcane dynasties, or a civilization obsessed with protecting its dead is left to the GM. Use these stat blocks as tools. Who built the tomb, and what secret must remain buried, is yours to decide.
