

VAMPIRE SPAWN: SPECIES VARIANTS

VAMPIRE SPAWN: SPECIES VARIANTS IS A MONSTER SUPPLEMENT FOR 5E THAT EXPLORES THE CONSEQUENCES OF vampirism across many different humanoid bloodlines. Rather than presenting vampire spawn as a single uniform creature, this book examines how the curse expresses itself through the physical traits of the host species. A dwarf spawn endures and anchors corridors, an elven spawn stalks with supernatural grace, while a troll spawn becomes a nearly unstoppable regenerating horror.

The intent of this product is mechanical preservation rather than escalation. Every creature in this book is built directly on the SRD vampire spawn chassis. Core abilities such as regeneration, spider climb, and life-draining bite remain unchanged. No variant increases the creature's damage output, save DCs, or control effects. Instead, each variant retains one defining biological trait from its living form.

These creatures exist to expand encounter variety without altering the fundamental power of the base monster. A vampire spawn may arise from any humanoid lineage, and the results can dramatically alter how a hunting pack behaves in different environments. Sewer warrens may host ratfolk spawn, flooded ruins may conceal merfolk spawn, and ancient fortresses may hide disciplined hobgoblin spawn.

Lore surrounding the spread of vampirism is intentionally minimal. Whether these creatures serve a master vampire, rule their own territories, or simply exist as cursed predators is left to the GM. Use these stat blocks as tools for encounter diversity. The curse is the same — only the vessel has changed.

ACTIONS

Multiattack. This vampire spawn makes two attacks, only one of which can be a bite.

Claw. *Melee Weapon Attack:* +7 to hit, reach 5 ft., one target. *Hit:* 9 (2d4 + 4) slashing damage, and the target is grappled (escape DC 12).

Bite. *Melee Weapon Attack:* +7 to hit, reach 5 ft., one willing creature, or a creature that is grappled by this vampire spawn, incapacitated, or restrained. *Hit:* 7 (1d6 + 4) piercing damage plus 7 (2d6) necrotic damage. The target's hit point maximum is reduced by an amount equal to the necrotic damage taken, and this vampire spawn regains hit points equal to that amount. The reduction lasts until the target finishes a long rest. The target dies if this effect reduces its hit point maximum to 0.
