About these maps

There are 13 different kinds of railcars, two roof maps, and seven track maps.

The roof maps are designed to be to roof of any of the railcars, and the track maps can be used independently, or with railcars overlaid on the tracks to provide the environment for the railcar.

Grassland Track with no railcar

Grassland Track with passenger railcar overlaid on track

For all railcars

VTT Settings: (each unit is 70 pixels)
Page Size: 55 units wide by 14 units high
Scale: 1 unit = 1 m (or 3 ft.)
Grid Size: 1 unitsTroop Railcar

Troop Railcar

The government often transported troops by rail in special troop cars.

Sleeper Railcar

As rail travel in the wild west would often take many days, those who could afford it would rent small sleeper rooms.

Passenger Railcar

The most common kind of railcar was the passenger car where passengers would sit in relative comfort for the journey.

Luggage Railcar

Cargo and luggage would be transported in special luggage railcars, off limits to passengers..

Dining Railcar

Meals are served for those who could afford it in the relative comfort of the dining car. It would also serve as a place for socializing outside of meal times.

Common Sleeper Railcar

For the less well off, triple bunks are provided for rest on long journey. Not known for be clean or quiet. The train staff sleeping area can also be found here.

Common Passenger Railcar

Cheaper, but less comfortable than a standard passenger railcar, the common passenger railcar consists of nothing other than benches and luggage racks.

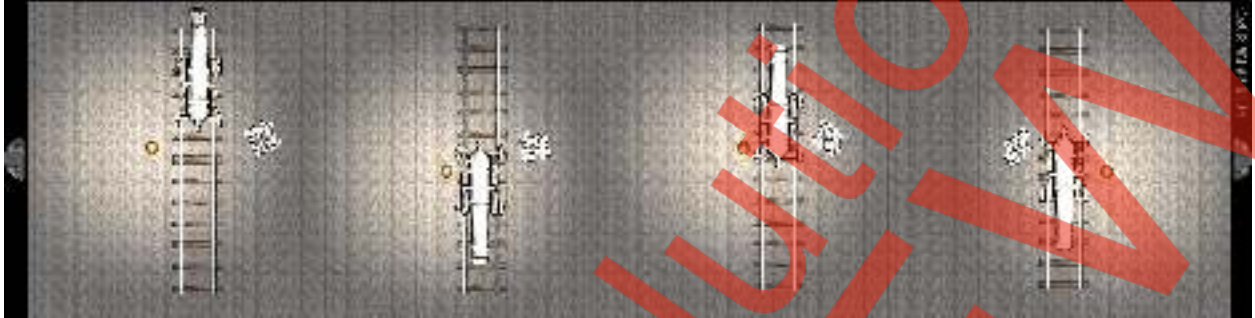

Cattle Car

For transporting livestock.

Cannon Railcar

Military trains were often equipped with open sided cannon cars for defence an assault.

Boxcar

The most common of all railcars, the boxcar is used to transport goods.

Blank Railcar

A blank railcar for you to customize to your needs.

Caboose

The caboose was the administrative and safety centre for the train. Here you can find passenger list, cargo manifests, schedules, waybills, and emergency supplies.

Caboose Upper

The standard caboose had a small room on the roof to give the brakeman and flagman visibility of the surroundings.

Railcar Roof

Can be used as the roof for any railcar.

Steam Locomotive

A bucket car for holding the coal that would power the steam engine is behind a noisy, dirty, and dangerous steam engine.

Western Station Track

The train station of a frontier town has a passenger waiting room, a loading platform, and a ticket office.

VTT Settings: (each unit is 70 pixels)
Page Size: 55 units wide by 29 units high
Scale: 1 unit = 1 m (or 3 ft.)
Grid Size: 1 units

For all track maps

VTT Settings: (each unit is 70 pixels)

Page Size: 55 units wide by 44 units high

Scale: 1 unit = 1 m (or 3 ft.)

Grid Size: 1 units

Plains Track

Track running through some nondescript plains.

Mountain Track

Track running through along a steep mountainside.

Grasslands Track

Track running through some nondescript grasslands.

Desert Track

Track running through some nondescript desert.

Bridge Track

Track running across a bridge.

Arctic Track

Track running through some nondescript arctic or snow covered region.

For each location, maps are provided for:

- With grid and without grid

This set includes the following files:
