About these maps

When the galactic empire needs a show serious of force or need to occupy a planet, they deploy a tower military fortress.

These modular bases can be configured in countless ways, but the overall structure depends on if the tower is being deployed on land, on water, or is meant to float in the air.

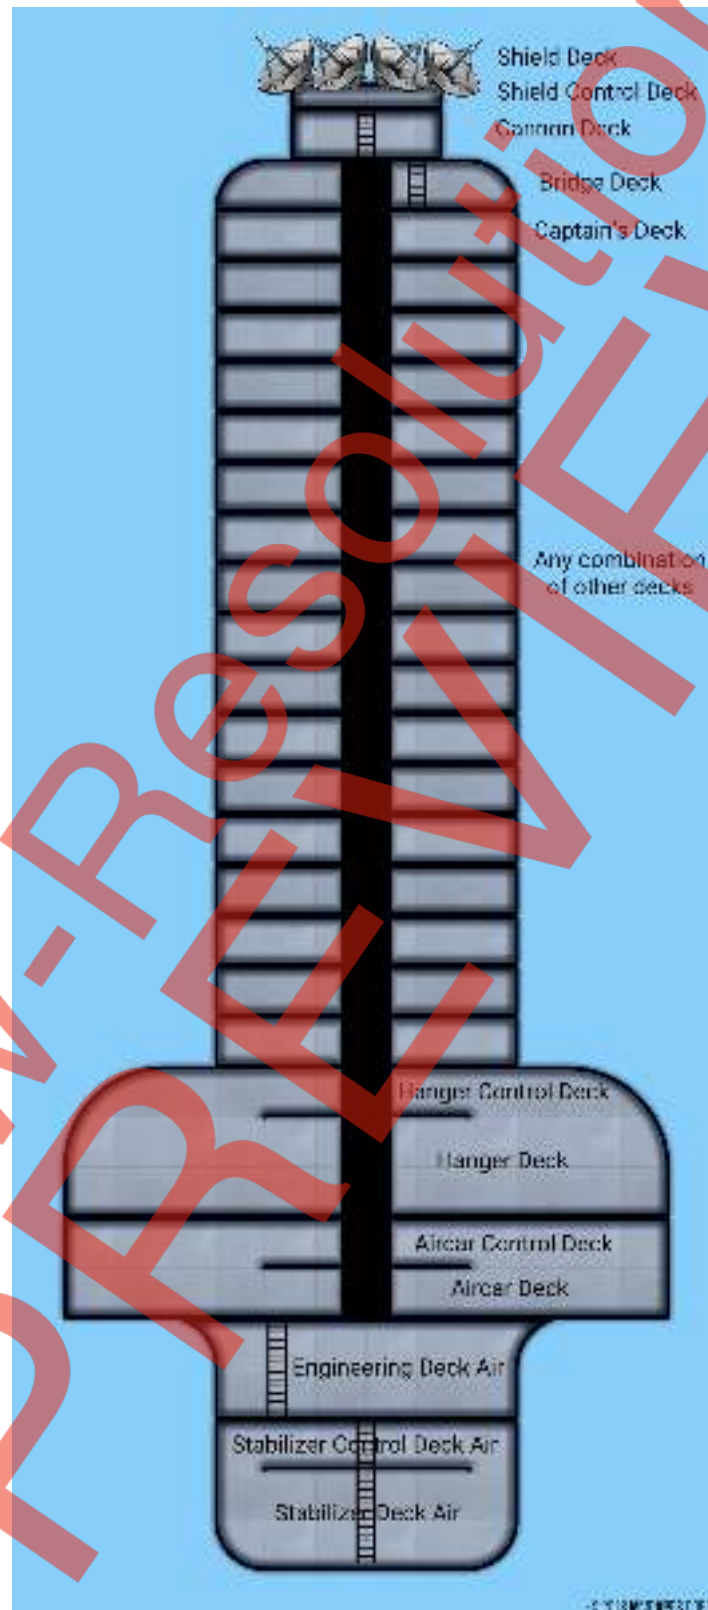

Four elevators span the entire height of each tower forming the core of the structure.

All configurations have a standard hanger deck and hanger control deck for spaceships, as well a shield deck which protects the tower, a shield control deck, a bridge, and an captain's deck. After that each tower is uniquely configured based on need.

Land Tower Configuration

Air Tower Configuration

Water Tower Configuration

Shield Deck

Protecting the tower is a powerful deflector shield that sits at the top.

VTT Settings: (each unit is 70 pixels)
Page Size: 24 units wide by 24 units high
Scale: 1 unit = 1 m (or 3 ft.)
