

Smart Weapons

Name	Cost	Weight	Description
Biometric Smart Pistol	\$4.5K	2.1 lbs	A handgun that only fires for registered users, logging every shot and syncing with neural HUDs.
Neural-Link Smart Rifle	\$12K	9.5 lbs	A rifle that interfaces directly with neural implants for targeting assistance and recoil compensation.
AI-Assisted SMG	\$9K	6.8 lbs	A compact smart weapon that predicts target movement and adjusts burst timing automatically.
Smart Shotgun Platform	\$11K	10.2 lbs	A shotgun with adaptive spread control and biometric safety locks.
Smart Sniper System	\$28K	14.6 lbs	A long-range smart weapon that compensates for wind, elevation, and target motion via onboard AI.
HUD-Synced Machine Pistol	\$6K	3.4 lbs	A rapid-fire sidearm that overlays targeting data directly into the user's visual feed.
Smart Burst Carbine	\$10K	8.2 lbs	A mid-range smart weapon optimized for controlled bursts and urban combat analytics.
Self-Calibrating Smart Rifle	\$14K	9.9 lbs	Automatically recalibrates sensors after drops, damage, or environmental exposure.
Voice-Command Smart Pistol	\$5K	2.3 lbs	Responds to encrypted vocal commands for firing modes and safety overrides.
Target-Priority Smart SMG	\$8.5K	6.5 lbs	Uses threat-ranking algorithms to highlight the most dangerous targets in real time.
Smart Coil Weapon	\$18K	11.4 lbs	An electromagnetically assisted smart weapon with programmable firing profiles.
Neural-Locked Corporate Sidearm	\$7.5K	2.6 lbs	A high-end smart pistol designed for corporate security and executive protection.

Smart Precision DMR	\$16K	12.1 lbs	A designated marksman weapon with predictive shot correction and target tagging.
Adaptive Smart Shotgun	\$13K	10.8 lbs	Adjusts firing pattern based on range, movement, and user intent.
Smart Concealable Pistol	\$4K	1.9 lbs	A slim smart sidearm optimized for discreet carry and biometric security.
Crowd-Control Smart Launcher	\$22K	15.2 lbs	A smart weapon designed to track and mark multiple targets in dense environments.
Neural Reflex Smart SMG	\$9.5K	6.9 lbs	Synchronizes with reflex enhancers to minimize reaction delay during firefights.
Smart Heavy Support Weapon	\$35K	22 lbs	A crew-rated smart weapon that coordinates targeting data across multiple users.
Smart Urban Defense Carbine	\$11.5K	8.7 lbs	Tuned for close-quarters combat with rapid target acquisition algorithms.
Neural-Override Smart Pistol	\$6.5K	2.4 lbs	Allows emergency firing control directly through neural input when physical grip is compromised.
Smart Precision Hand Cannon	\$9K	3.8 lbs	A high-caliber smart sidearm with recoil dampening and predictive aiming.
Smart Long-Range Hunter	\$26K	13.9 lbs	A smart rifle optimized for tracking and eliminating moving targets over extreme distances.
Encrypted Smart SMG	\$8K	6.6 lbs	Uses rotating encryption keys to prevent unauthorized network access or hijacking.
Smart Tactical Bullpup	\$12.5K	8.9 lbs	A compact smart weapon balancing firepower with enhanced situational awareness.
Neural-Coordinated Smart Rifle	\$15K	10.4 lbs	Shares targeting data with squad-linked neural networks.
Smart Suppression Platform	\$20K	18.3 lbs	Designed to maintain continuous fire while optimizing heat and ammo usage via AI.
Smart Urban Marksman Rifle	\$17K	11.8 lbs	Optimized for rooftop and street-level engagements in dense cityscapes.

Smart Close-Defense Sidearm	\$5.5K	2.2 lbs	Prioritizes rapid acquisition and firing safety in confined spaces.
Smart Predictive Assault Weapon	\$19K	12.7 lbs	Uses probabilistic modeling to anticipate target behavior seconds ahead.
Corporate Executive Smart Pistol	\$10K	2.9 lbs	A luxury smart sidearm with enhanced security, analytics, and neutral design.

Exotic / Tech Weapons

Name	Cost	Weight	Description
Directed Energy Sidearm	\$14K	3.2 lbs	A compact energy weapon that fires focused beams capable of burning through light cover.
Sonic Disruptor Pistol	\$11K	3.6 lbs	Emits concentrated sound waves that disorient and injure targets through resonance.
Microwave Projector	\$18K	9.8 lbs	Uses focused microwave radiation to disable electronics and cause extreme discomfort.
Plasma Arc Carbine	\$26K	12.4 lbs	Fires superheated plasma arcs stabilized by magnetic fields.
Electrolaser Rifle	\$21K	10.7 lbs	Launches ionized channels to deliver high-voltage electrical shocks at range.
Nanite Delivery Launcher	\$35K	8.9 lbs	Injects programmable nanites into targets via micro-projectiles.
Monofilament Whip Emitter	\$16K	2.1 lbs	Projects a near-invisible cutting filament capable of slicing through most materials.
Particle Beam Projector	\$42K	14.8 lbs	Accelerates charged particles to inflict severe thermal and kinetic damage.
EMP Pulse Gun	\$19K	6.5 lbs	Emits focused electromagnetic bursts that disable cyberware and electronics.
Sonic Scatter Cannon	\$24K	13.6 lbs	A wide-area sonic weapon designed for crowd suppression and denial.
Ionized Flechette Launcher	\$17K	7.9 lbs	Fires energized micro-darts that penetrate armor and disrupt nervous systems.

Arc Lightning Rifle	\$29K	11.3 lbs	Projects chained electrical arcs that can jump between nearby targets.
Thermal Lance Weapon	\$22K	9.1 lbs	A handheld industrial cutter repurposed as a devastating close-range weapon.
Gravitic Shock Emitter	\$38K	15.4 lbs	Manipulates localized gravity to crush or throw targets violently.
Neuroshock Projector	\$27K	5.8 lbs	Induces neural overload through targeted electromagnetic stimulation.
Hardlight Blade Generator	\$31K	4.2 lbs	Forms a solid-energy blade capable of cutting and parrying.
Radiation Spray Weapon	\$33K	10.9 lbs	Emits controlled radiation bursts that damage living tissue and electronics.
Cryo Pulse Gun	\$20K	7.4 lbs	Fires supercooled energy pulses that rapidly freeze targets and surfaces.
Smart Toxin Aerosolizer	\$15K	6.2 lbs	Deploys targeted chemical clouds guided by biometric sensors.
Laser Scatter Rifle	\$25K	12.6 lbs	Fires multiple low-power laser beams that converge at the target point.
Sonic Needle Pistol	\$9.5K	2.8 lbs	Uses high-frequency vibrations to puncture tissue with minimal visible damage.
Magnetic Rail Sidearm	\$18.5K	4.1 lbs	Accelerates metal slugs using magnetic rails instead of chemical propellants.
Disruption Wave Projector	\$34K	14.2 lbs	Releases destabilizing energy waves that interfere with matter cohesion.
Biofeedback Weapon	\$23K	5.6 lbs	Attacks the nervous system by amplifying the target's own bioelectric signals.
Heat Bloom Emitter	\$21K	8.3 lbs	Rapidly increases ambient temperature around a focused point.
Neural Scrambler Gun	\$28K	6.9 lbs	Temporarily scrambles neural signals, causing loss of motor control.
Photonic Needle Rifle	\$37K	11.7 lbs	Fires concentrated light pulses capable of piercing armor at range.
Corrosive Nanocloud Projector	\$40K	9.4 lbs	Releases self-replicating nanites that break down materials on contact.
Phase Disruption Blade	\$33K	3.9 lbs	A melee tech weapon that destabilizes molecular bonds on impact.

Quantum Interference Weapon	\$55K	16.8 lbs	Experimental tech weapon that disrupts matter at a quantum level.
-----------------------------	-------	----------	---

Neural Implants

Name	Cost	Weight	Description
Basic Neural Interface	\$2.5K	-	A standard neural socket allowing direct connection to smart devices and cyberware.
Accelerated Thought Node	\$18K	-	Enhances cognitive processing speed for faster decision-making.
Memory Buffer Implant	\$6K	-	Temporarily stores sensory data for later review or extraction.
Neural Firewall Core	\$9.5K	-	Protects the brain from hostile signals, hacks, and intrusive feedback.
Reflex Synchronization Chip	\$14K	-	Improves coordination between thought and muscle response.
Neural HUD Processor	\$4K	-	Routes augmented reality displays directly into the visual cortex.
Cognitive Load Balancer	\$7K	-	Reduces mental fatigue during prolonged multitasking or data immersion.
Neural Command Relay	\$5.5K	-	Enables silent mental control of linked cyberware and devices.
Emotion Regulation Implant	\$11K	-	Dampens extreme emotional responses to maintain focus under stress.
Tactical Prediction Node	\$26K	-	Uses probabilistic modeling to anticipate immediate environmental threats.
Neural Encryption Suite	\$13K	-	Encrypts outgoing and incoming neural signals against interception.
Multi-Thread Cognition Implant	\$22K	-	Allows parallel thought streams for complex planning and analysis.
Sensory Priority Router	\$6.5K	-	Dynamically prioritizes sensory input to prevent overload.
Memory Editing Implant	\$35K	-	Allows selective suppression or alteration of stored memories.
Neural Signal Amplifier	\$8K	-	Strengthens weak neural impulses for improved cyberware responsiveness.

Name	Cost	Weight	Description
Sleep Suppression Node	\$10K	-	Reduces the biological need for sleep for extended periods.
Pain Override Processor	\$17K	-	Suppresses pain signals without affecting physical awareness.
Neural Stress Filter	\$9K	-	Minimizes panic and shock responses during high-threat situations.
Thought-to-Text Encoder	\$4.5K	-	Converts internal speech directly into digital text streams.
Neural Feedback Dampener	\$7.5K	-	Reduces harmful neural feedback from damaged or unstable cyberware.
Subconscious Pattern Analyzer	\$24K	-	Identifies behavioral patterns and habits at the subconscious level.
Neural Latency Reducer	\$15K	-	Shortens delay between neural intent and cybernetic action.
Memory Vault Implant	\$19K	-	Securely stores encrypted memories accessible only by the owner.
Cognitive Overclock Module	\$28K	-	Temporarily boosts mental performance beyond safe biological limits.
Neural Identity Core	\$12K	-	Hard-links personal identity credentials directly to neural activity.
Dream Recording Implant	\$5K	-	Records and stores dream-state neural activity for later playback.
Neural Recovery Regulator	\$8.5K	-	Accelerates mental recovery after trauma or neural overload.
Thought Suppression Chip	\$16K	-	Blocks specific mental triggers or intrusive thought patterns.
Autonomous Decision Assist	\$32K	-	Provides subconscious recommendations during critical moments.
Experimental Neural Mesh	\$65K	-	A bleeding-edge implant replacing large portions of neural processing with synthetic pathways.

Optical Implants

Name	Cost	Weight	Description
Basic Optical Replacement	\$3K	-	A standard cybernetic eye providing vision equivalent to natural human sight.
Low-Light Vision Implant	\$6K	-	Enhances visibility in dim or near-dark environments without external light sources.
Infrared Vision Implant	\$9K	-	Allows perception of heat signatures and thermal gradients.
Ultraviolet Vision Implant	\$8.5K	-	Extends vision into the ultraviolet spectrum for tracking and analysis.
Optical Zoom Module	\$7K	-	Enables variable magnification for long-distance viewing.
Retinal HUD Overlay	\$4.5K	-	Projects augmented reality data directly onto the user's visual field.
Optical Targeting Assist	\$12K	-	Highlights and tracks selected targets in real time.
Facial Recognition Suite	\$14K	-	Identifies and cross-references faces against stored databases.
Optical Recording Implant	\$5.5K	-	Records everything the user sees for later review or export.
Glare Suppression Lenses	\$3.5K	-	Automatically reduces glare from bright lights and reflections.
Depth Perception Enhancer	\$6.5K	-	Improves spatial awareness and distance judgment.
Motion Prediction Optics	\$18K	-	Predicts movement trajectories and overlays them visually.
Optical Encryption Filter	\$11K	-	Scrambles outgoing visual data to prevent unauthorized recording or interception.
Visual Threat Highlighter	\$16K	-	Marks potential threats based on movement, posture, and behavior.
Color Spectrum Enhancer	\$4K	-	Expands color differentiation beyond normal human limits.
Optical Image Stabilizer	\$5K	-	Reduces visual distortion during rapid movement or recoil.
Night Vision Optics	\$7.5K	-	Amplifies minimal ambient light for clear night-time vision.

Name	Cost	Weight	Description
Visual Data Streamer	\$9K	-	Streams live visual data to connected devices or allies.
Optical Blindspot Monitor	\$10K	-	Alerts the user to motion detected outside their direct field of view.
Retinal Map Overlay	\$6K	-	Projects navigational maps directly into the user's vision.
Optical Pattern Analyzer	\$13K	-	Detects visual patterns and anomalies invisible to the naked eye.
Adaptive Focus Implant	\$4.8K	-	Instantly adjusts focus between near and distant objects.
Optical Identity Scanner	\$15K	-	Analyzes biometric indicators visible in the eyes and face.
Visual Noise Filter	\$3.8K	-	Reduces visual clutter in dense urban environments.
Optical Cloak Detector	\$21K	-	Detects visual distortions caused by active camouflage or cloaking tech.
Retinal Health Monitor	\$5.2K	-	Continuously scans for eye strain, damage, or implant degradation.
Optical Reflex Booster	\$17K	-	Reduces visual processing delay during high-speed situations.
Augmented Reality Composer	\$8K	-	Allows custom AR environments layered over real-world vision.
Visual Memory Indexer	\$11.5K	-	Automatically tags and catalogs recorded visual data.
Experimental Photonic Eye	\$48K	-	A cutting-edge optical implant using synthetic photonic processors for extreme clarity and speed.

Audio Implants

Name	Cost	Weight	Description
Basic Auditory Replacement	\$2.5K	-	A standard cybernetic ear providing hearing equivalent to natural human range.
Noise Dampening Implant	\$4K	-	Automatically reduces harmful or overwhelming sound levels.
Audio Enhancement Suite	\$6.5K	-	Amplifies faint sounds while preserving clarity and balance.

Name	Cost	Weight	Description
Directional Hearing Module	\$7K	-	Precisely identifies the direction and distance of detected sounds.
Frequency Isolation Processor	\$8K	-	Filters specific sound frequencies while muting others.
Audio Recording Implant	\$5K	-	Records all audible input for later playback or analysis.
Subsonic Detection Implant	\$9.5K	-	Detects vibrations and sounds below normal human hearing.
Ultrasonic Hearing Implant	\$11K	-	Extends perception into ultrasonic frequency ranges.
Voice Pattern Analyzer	\$12.5K	-	Identifies speakers and analyzes vocal stress, tone, and authenticity.
Audio Threat Recognition	\$14K	-	Flags sounds associated with danger such as weapons, alarms, or pursuit.
Echo Mapping Processor	\$10K	-	Uses sound reflection to map enclosed spaces in real time.
Silent Communication Receiver	\$6K	-	Receives encrypted audio transmissions without external devices.
Audio Encryption Core	\$13K	-	Encrypts all outgoing and incoming audio signals.
Language Translation Implant	\$15K	-	Instantly translates spoken languages directly into neural comprehension.
Auditory Focus Enhancer	\$5.5K	-	Allows the user to isolate and focus on a single sound source.
Bone-Conduction Listener	\$4.5K	-	Transmits sound through bone conduction for clarity in noisy environments.
Audio Feedback Suppressor	\$7.5K	-	Prevents feedback loops caused by cyberware or signal interference.
Sonic Pattern Analyzer	\$16K	-	Detects repeating or artificial sound patterns in complex environments.
Auditory Stress Filter	\$8.8K	-	Reduces stress responses caused by sudden or sustained noise.
Acoustic Cloak Detector	\$18K	-	Identifies sound distortions caused by stealth or sound-masking technology.
Spatial Audio Simulator	\$9K	-	Creates precise three-dimensional sound positioning.
Whisper Boost Implant	\$6.8K	-	Amplifies low-volume speech without increasing background noise.

Name	Cost	Weight	Description
Auditory Memory Indexer	\$11.5K	-	Tags and catalogs recorded audio for rapid retrieval.
Sound Signature Tracker	\$17K	-	Tracks unique audio signatures over time and distance.
Audio Reflex Booster	\$14.5K	-	Reduces delay between auditory input and neural response.
Environmental Noise Analyzer	\$10.5K	-	Breaks down ambient noise into identifiable components.
Auditory Health Monitor	\$5.2K	-	Continuously checks implant integrity and hearing performance.
Resonance Disruption Filter	\$19K	-	Neutralizes harmful resonant frequencies before neural processing.
Multi-Channel Audio Router	\$12K	-	Routes multiple simultaneous audio feeds without overlap.
Experimental Quantum Audio Mesh	\$42K	-	A cutting-edge implant using quantum processing for extreme audio clarity and precision.

Limb Replacements

Name	Cost	Weight	Description
Basic Cybernetic Arm	\$6K	-	A standard replacement arm restoring full strength and dexterity.
Reinforced Cybernetic Arm	\$12K	-	An upgraded arm built with strengthened internal supports for heavy use.
Precision Cybernetic Arm	\$18K	-	A finely tuned arm designed for delicate, high-accuracy tasks.
Basic Cybernetic Leg	\$5.5K	-	A standard replacement leg providing normal mobility and balance.
Reinforced Cybernetic Leg	\$11K	-	A heavy-duty leg engineered for impact resistance and endurance.
Agile Cybernetic Leg	\$14K	-	Optimized for speed, balance, and rapid directional changes.
Dual Arm Replacement Set	\$22K	-	A matched pair of cybernetic arms calibrated to work in perfect sync.
Dual Leg Replacement Set	\$20K	-	A balanced pair of cybernetic legs providing enhanced stability.

Name	Cost	Weight	Description
Industrial-Grade Cyber Arm	\$16K	-	Built for sustained physical labor in hazardous environments.
Industrial-Grade Cyber Leg	\$15K	-	Designed for long hours of load-bearing and harsh terrain.
Shock-Absorbing Cyber Leg	\$19K	-	Integrates advanced dampening systems to reduce fall and impact damage.
Modular Cyber Arm	\$24K	-	Features interchangeable internal modules for task specialization.
Modular Cyber Leg	\$23K	-	Allows configuration changes for terrain, speed, or load capacity.
Combat-Optimized Cyber Arm	\$28K	-	Tuned for high-speed reaction and durability under combat stress.
Combat-Optimized Cyber Leg	\$27K	-	Engineered for explosive movement and rapid recovery.
Sensory-Enhanced Cyber Arm	\$21K	-	Provides advanced tactile feedback exceeding natural sensation.
Sensory-Enhanced Cyber Leg	\$20K	-	Improves ground feel and spatial awareness during movement.
Hydraulic Assist Cyber Arm	\$30K	-	Uses compact hydraulics to significantly amplify lifting power.
Hydraulic Assist Cyber Leg	\$29K	-	Enhances jump height and carrying capacity through powered motion.
Lightweight Carbon Cyber Arm	\$17K	-	A reduced-mass arm prioritizing speed and endurance.
Lightweight Carbon Cyber Leg	\$16.5K	-	Minimizes fatigue while maintaining structural integrity.
Stealth-Coated Cyber Arm	\$26K	-	Treated with materials that reduce detection by sensors and scanners.
Stealth-Coated Cyber Leg	\$25K	-	Dampens sound and signal emissions during movement.
Adaptive Balance Cyber Leg	\$18.5K	-	Continuously adjusts micro-movements to maintain balance.
Neural-Synced Cyber Arm	\$32K	-	Directly links to neural processors for near-instant response.
Neural-Synced Cyber Leg	\$31K	-	Provides seamless coordination with neural control systems.
Environmental-Sealed Cyber Arm	\$14.5K	-	Rated for extreme temperatures, moisture, and contamination.

Name	Cost	Weight	Description
Environmental-Sealed Cyber Leg	\$14K	-	Maintains performance in harsh or hostile environments.
Luxury Synthetic Limb	\$40K	-	A high-end replacement designed to appear completely organic.
Experimental Adaptive Limb	\$75K	-	A cutting-edge limb that dynamically reconfigures internal systems in real time.

Subdermal Enhancements

Name	Cost	Weight	Description
Subdermal Reinforcement Layer	\$8K	-	A thin structural layer beneath the skin that increases resistance to blunt trauma.
Reactive Dermal Mesh	\$15K	-	A flexible subdermal lattice that stiffens momentarily under impact.
Ballistic Skin Weave	\$22K	-	A dense synthetic weave that disperses kinetic force across a wider area.
Thermal Regulation Matrix	\$6.5K	-	Actively manages body temperature against extreme heat or cold.
Subdermal Shock Absorbers	\$12K	-	Reduces internal damage from falls, collisions, and sudden impacts.
Electromagnetic Shielding Layer	\$18K	-	Protects internal cyberware from electromagnetic interference and surges.
Subdermal Power Conduits	\$9K	-	Routes power safely between implants without external cabling.
Chemical Resistance Coating	\$11K	-	Limits absorption of toxins and corrosive substances through the skin.
Adaptive Pigment Layer	\$7K	-	Alters skin tone and pattern for cosmetic or concealment purposes.
Subdermal Sensor Grid	\$14K	-	Embeds micro-sensors that monitor pressure, damage, and contact points.
Impact Redistribution Matrix	\$21K	-	Redirects force away from vital organs during high-impact events.
Dermal Signal Antenna	\$10K	-	Uses the skin as a signal relay for short-range wireless communication.

Name	Cost	Weight	Description
Self-Sealing Dermal Layer	\$16K	-	Automatically closes minor wounds to reduce bleeding and contamination.
Subdermal Data Lattice	\$13K	-	Stores and transmits encrypted data through embedded microfilaments.
Kinetic Feedback Dampener	\$17K	-	Softens feedback from powerful cybernetic movements.
Structural Bone Interface	\$20K	-	Reinforces attachment points between skeleton and cybernetic limbs.
Subdermal Light Emitters	\$5K	-	Embedded illumination strips beneath the skin for visibility or signaling.
Electrostatic Discharge Layer	\$9.5K	-	Safely grounds excess electrical buildup from cyberware systems.
Dermal Repair Nanites	\$24K	-	Continuously repair micro-tears and stress damage beneath the skin.
Subdermal Muscle Anchor	\$18.5K	-	Improves force transfer between muscles and cybernetic components.
Environmental Pressure Buffer	\$14.5K	-	Reduces injury from rapid pressure changes or compression.
Subdermal Heat Sink Network	\$19K	-	Dissipates excess heat generated by intensive cyberware use.
Vibration Isolation Layer	\$11.5K	-	Minimizes damage from sustained vibration or resonance.
Dermal Identity Marker	\$6K	-	Encodes secure biometric identity data beneath the skin.
Reactive Pain Filter Layer	\$15.5K	-	Moderates pain signals triggered by surface trauma.
Subdermal Camouflage Matrix	\$27K	-	Actively alters surface appearance to disrupt visual detection.
Biofeedback Enhancement Layer	\$13.5K	-	Improves internal monitoring of stress and physical performance.
Structural Integrity Monitor	\$8.5K	-	Continuously scans for internal strain or failure points.
Luxury Dermal Augmentation	\$32K	-	A premium enhancement offering seamless integration and cosmetic perfection.
Experimental Adaptive Dermal System	\$68K	-	A cutting-edge subdermal network that reconfigures itself based on threat and environment.

Reflex & Combat Enhancers

Name	Cost	Weight	Description
Basic Reflex Booster	\$7K	-	Slightly accelerates neural response time during sudden movement or threat.
Combat Reflex Accelerator	\$14K	-	Significantly reduces delay between perception and physical action.
Adrenal Response Regulator	\$9K	-	Optimizes natural adrenaline release for controlled combat performance.
Neural Reaction Optimizer	\$18K	-	Improves reaction consistency under stress and fatigue.
Motor Control Enhancer	\$11K	-	Smooths and refines fine motor control during rapid actions.
Reflex Prediction Node	\$22K	-	Anticipates imminent movement and primes muscles before conscious action.
Combat Focus Implant	\$8.5K	-	Narrows attention during combat to reduce distraction and hesitation.
Threat Response Amplifier	\$16K	-	Enhances instinctive reactions to perceived danger signals.
Subconscious Dodge Assist	\$19K	-	Triggers micro-movements to evade incoming threats.
Neural Timing Synchronizer	\$12K	-	Improves coordination between sensory input and muscle response.
Reflex Overdrive Module	\$25K	-	Temporarily pushes reaction speed beyond safe biological limits.
Combat Tempo Regulator	\$10K	-	Maintains optimal pacing during prolonged engagements.
Motion Initiation Booster	\$13K	-	Reduces hesitation at the start of physical actions.
Situational Awareness Enhancer	\$17K	-	Improves perception of fast-changing combat environments.
Neural Latency Suppressor	\$15.5K	-	Minimizes processing delays caused by cyberware signal routing.
Pain Response Suppressor	\$14.5K	-	Prevents pain from interfering with combat reactions.
Combat Stress Buffer	\$9.8K	-	Dampens shock and panic responses during violent encounters.

Name	Cost	Weight	Description
Micro-Movement Stabilizer	\$11.5K	-	Improves balance and precision during rapid directional changes.
Predictive Threat Processor	\$28K	-	Uses pattern analysis to anticipate hostile actions moments ahead.
Reaction Chain Enhancer	\$20K	-	Allows faster follow-up actions after initial movement.
Neural Combat Loop	\$24K	-	Creates a closed neural loop optimized for repetitive combat actions.
Reflex Coordination Suite	\$18.5K	-	Harmonizes multiple reflex-related implants for smoother response.
Muscle Firing Optimizer	\$16.5K	-	Improves efficiency of muscle activation under load.
Combat Initiative Implant	\$21K	-	Biases neural processing toward acting before opponents.
Reflex Fatigue Reducer	\$12.5K	-	Slows performance degradation during extended combat.
High-Speed Combat Processor	\$30K	-	Dedicated neural processor focused exclusively on combat reactions.
Neural Counterstrike Assist	\$19.5K	-	Automatically primes counter-actions after detecting an attack.
Reflex Recovery Enhancer	\$10.5K	-	Speeds recovery time between bursts of intense action.
Luxury Combat Reflex Suite	\$38K	-	A premium enhancement offering refined, stable, and discreet performance.
Experimental Combat Reflex Matrix	\$72K	-	A bleeding-edge system that rewires reflex pathways for extreme speed and adaptability.

Medical Implants

Name	Cost	Weight	Description
Basic Vital Monitor Implant	\$3.5K	-	Continuously tracks heart rate, respiration, and core vitals.
Auto-Stabilization Implant	\$8K	-	Actively regulates vital functions during trauma or shock.
Blood Filtration System	\$12K	-	Filters toxins and impurities directly from the bloodstream.

Name	Cost	Weight	Description
Immune Boost Implant	\$10K	-	Enhances immune response against disease and infection.
Regenerative Tissue Stimulator	\$18K	-	Accelerates natural healing of wounds and damaged tissue.
Pain Management Implant	\$7K	-	Controls chronic or acute pain without impairing awareness.
Metabolic Regulation Node	\$9.5K	-	Optimizes nutrient absorption and energy usage.
Oxygen Optimization Implant	\$11K	-	Improves oxygen efficiency in blood and muscle tissue.
Neural Trauma Buffer	\$15K	-	Reduces neurological damage from concussive or electrical trauma.
Internal Hemorrhage Sealant	\$14K	-	Automatically seals internal bleeding through bio-reactive agents.
Detoxification Nanite Hub	\$22K	-	Deploys nanites to neutralize poisons and chemical agents.
Organ Function Stabilizer	\$13K	-	Maintains baseline organ performance under stress or injury.
Hormonal Balance Controller	\$8.5K	-	Regulates endocrine activity to prevent imbalance.
Cardiovascular Reinforcement Implant	\$17K	-	Strengthens heart and vascular performance.
Respiratory Enhancement Module	\$12.5K	-	Improves lung efficiency and resistance to airborne irritants.
Auto-Injector Implant	\$6K	-	Delivers stored medical compounds directly into the bloodstream.
Bone Density Enhancement Implant	\$16K	-	Increases skeletal resilience and fracture resistance.
Wound Clotting Accelerator	\$9K	-	Speeds clot formation to reduce blood loss.
Internal Diagnostic Processor	\$7.5K	-	Continuously scans the body for internal damage or anomalies.
Neurochemical Stabilizer	\$14.5K	-	Maintains balanced brain chemistry under stress.
Infection Suppression Implant	\$11.5K	-	Actively suppresses bacterial and viral infections.
Metabolic Recovery Booster	\$18.5K	-	Accelerates recovery from exhaustion or malnutrition.
Cellular Repair Nanites	\$26K	-	Conduct continuous micro-repair at the cellular level.

Name	Cost	Weight	Description
Pain Threshold Modulator	\$10.5K	-	Raises pain tolerance while preserving injury awareness.
Trauma Memory Suppressor	\$21K	-	Dampens long-term psychological impact of severe injury.
Internal Temperature Stabilizer	\$9.8K	-	Maintains safe internal temperature in extreme environments.
Emergency Life Support Implant	\$30K	-	Sustains critical body functions when natural systems fail.
Auto-Resuscitation Implant	\$35K	-	Attempts automated revival following cardiac or respiratory failure.
Luxury Medical Augmentation Suite	\$42K	-	Premium system offering discreet, high-efficiency medical support.
Experimental Full-Body Regeneration Core	\$85K	-	A cutting-edge implant enabling rapid systemic recovery from severe trauma.

Illegal / Experimental Cyberware

Name	Cost	Weight	Description
Black-Market Neural Accelerator	\$22K	-	An overclocked neural implant that boosts cognition at the cost of long-term stability.
Unlicensed Reflex Overdriver	\$28K	-	Pushes reaction speed beyond legal limits with severe neurological strain.
Ghost Signal Cortex Mod	\$31K	-	Masks neural activity to evade surveillance and biometric tracking.
Memory Wipe Implant	\$18K	-	Allows selective erasure of memories, often used to remove evidence or trauma.
Synthetic Adrenal Flooder	\$14K	-	Forces massive adrenaline surges regardless of physical condition.
Experimental Neural Fork	\$45K	-	Splits neural processing into parallel pathways with unpredictable side effects.
Pain Nullification Core	\$26K	-	Completely disables pain perception, risking unnoticed injury.
Black ICE Feedback Sink	\$34K	-	Absorbs neural damage from hostile netrunning attacks at extreme personal risk.

Name	Cost	Weight	Description
Cortical Override Implant	\$29K	-	Enables forced control over motor functions through external commands.
Illegal Cognitive Enhancer	\$21K	-	Boosts intelligence and memory using untested neurochemical pathways.
Autonomous Survival Node	\$38K	-	Takes control of bodily functions during life-threatening situations without consent.
Neural Burnout Dampener	\$19K	-	Delays neural collapse caused by sustained overuse of cyberware.
Experimental Emotion Suppressor	\$24K	-	Removes emotional response entirely, often leading to severe detachment.
Black Clinic Reflex Stack	\$41K	-	A layered reflex enhancement prohibited due to extreme neurological damage risk.
Synthetic Instinct Implant	\$33K	-	Replaces learned behavior with hardcoded survival instincts.
Neural Hallucination Projector	\$16K	-	Induces controlled hallucinations directly into sensory processing centers.
Illegal Memory Implant	\$27K	-	Installs fabricated memories indistinguishable from real experiences.
Cortical Reboot Module	\$36K	-	Forces a full neural reset after trauma, risking permanent personality change.
Overclocked Synapse Driver	\$30K	-	Accelerates synaptic firing beyond safe thermal thresholds.
Black Market Identity Core	\$23K	-	Rewrites biometric identity markers at the neural level.
Experimental Dream Control Implant	\$17K	-	Allows direct manipulation of dream states and subconscious behavior.
Neural Addiction Regulator	\$20K	-	Suppresses withdrawal symptoms while increasing long-term dependency.
Autonomous Combat Subroutine	\$44K	-	Temporarily cedes combat decisions to embedded AI logic.
Illegal Sensory Overload Filter	\$15K	-	Removes natural sensory limits, risking neural burnout.
Experimental Consciousness Backup	\$52K	-	Records neural states for potential restoration after death.

Name	Cost	Weight	Description
Black Market Mind Shield	\$28K	-	Blocks interrogation techniques by destabilizing memory recall.
Synthetic Personality Overlay	\$39K	-	Superimposes an artificial persona over the user's consciousness.
Neural Cascade Trigger	\$47K	-	Causes controlled chain reactions across neural networks for extreme performance bursts.
Forbidden Full Neural Mesh	\$68K	-	Replaces large portions of the brain's processing with synthetic architecture.
Prototype Digital Immortality Core	\$120K	-	Experimental system designed to preserve consciousness beyond biological death.

Fashionware

Name	Cost	Weight	Description
Chromed Dermal Finish	\$4K	-	A polished metallic skin coating designed purely for visual impact.
Adaptive Skin Pigment	\$3.5K	-	Allows on-demand changes to skin color and tone.
LED Dermal Patterning	\$2.8K	-	Embedded light patterns beneath the skin for customizable illumination.
Cosmetic Facial Sculpting	\$6K	-	Reshapes facial structure to idealized or stylized proportions.
Synthetic Hair Follicles	\$1.5K	-	Permanently installed hair fibers with programmable style and color.
Eye Color Modulator	\$1.2K	-	Enables instant changes to eye color and brightness.
