

SCIENCE FICTION **LUXURY PODS**

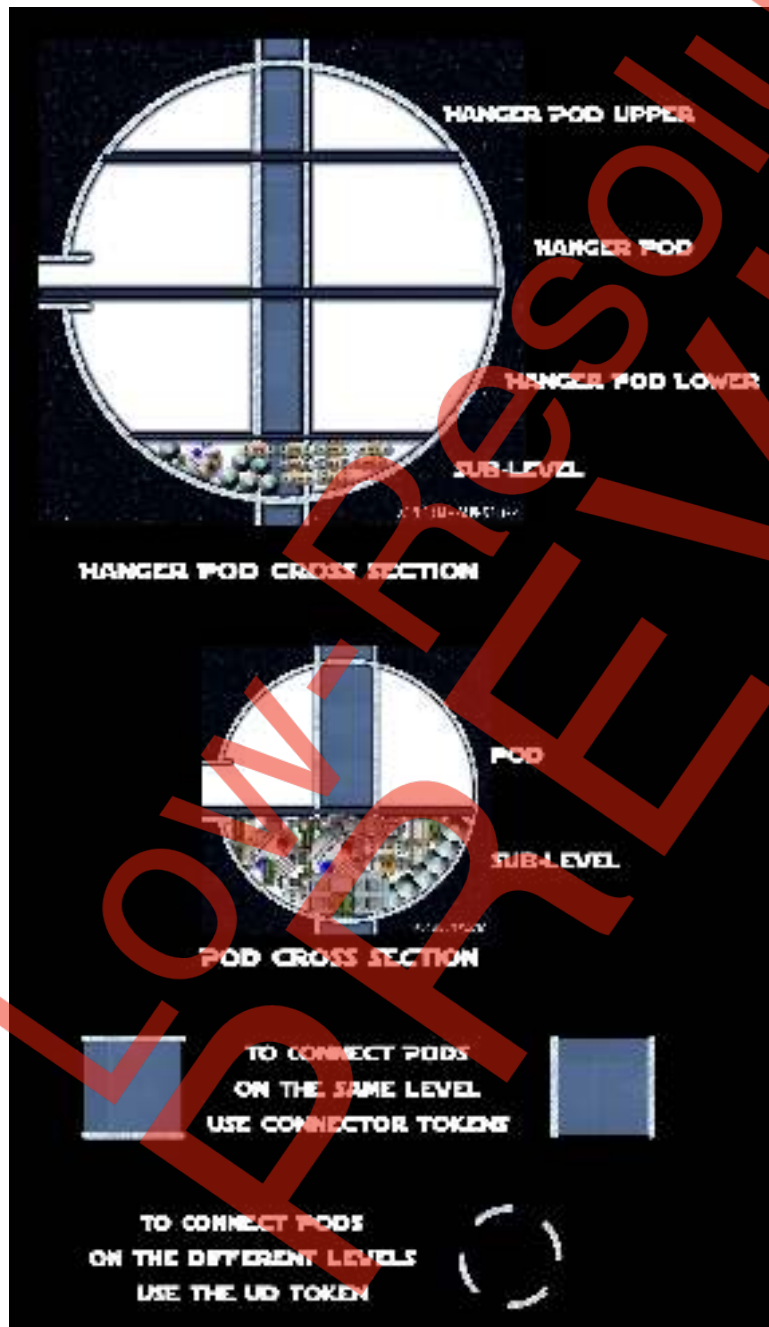

MAP PACK

About these maps

The rich, the famous, and the powerful need a luxury vacation get away. Luxury pods are a modular high-end resort complex that can be configured in any way. All pods built from a transparent material providing all-around view of the setting. They can be deployed in **space** (perhaps to view a beautiful nebula), on **water**, **underwater**, or they can float in the **air**.

Creator's note: I had a murder mystery adventure in this setting. Some pods may seem odd, like the Fencing Pod and the Zero-G Brawling Pod, but they were needed for that adventure so I included them here in case you might have use for them.

The hanger is larger than the standard pod.

Gravity is disabled in the UD connectors allowing guests and staff to float between levels
