

WESTERN ADVENTURES

Maps of a mine and mills

Mine

Mines were dirty and dangerous. Comes in lit and dark versions.

VTT Settings: (each unit is 70 pixels)
Page Size: 30 units wide by 30 units high
Scale: 1 unit = 1 m (or 3 ft.)
Grid Size: 1 units

Gold Buyer

The gold buyer would only come to town once per fortnight. He used a small unmarked shack on the outskirts of town. He emptied his safe and took his scale when he left leaving nothing of value.

Comes in standard and empty (when the buyer is not in town) versions.

VTT Settings: (each unit is 70 pixels)
Page Size: 11 units wide by 15 units high
Scale: 1 unit = 1 m (or 3 ft.)
Grid Size: 1 units

Gold Buyer - Roof

The gold buyer's shack has a simple wooden roof that leaks when it rains. But he never comes to town when it rains.

VTT Settings: (each unit is 70 pixels)
Page Size: 11 units wide by 15 units high
Scale: 1 unit = 1 m (or 3 ft.)
Grid Size: 1 units

These mills grind grain into flour. The order of the floors is different per mill.

Water Mill

1. Underneath
2. Wheel Floor
3. Grind Floor
4. Loading Floor
5. Roof

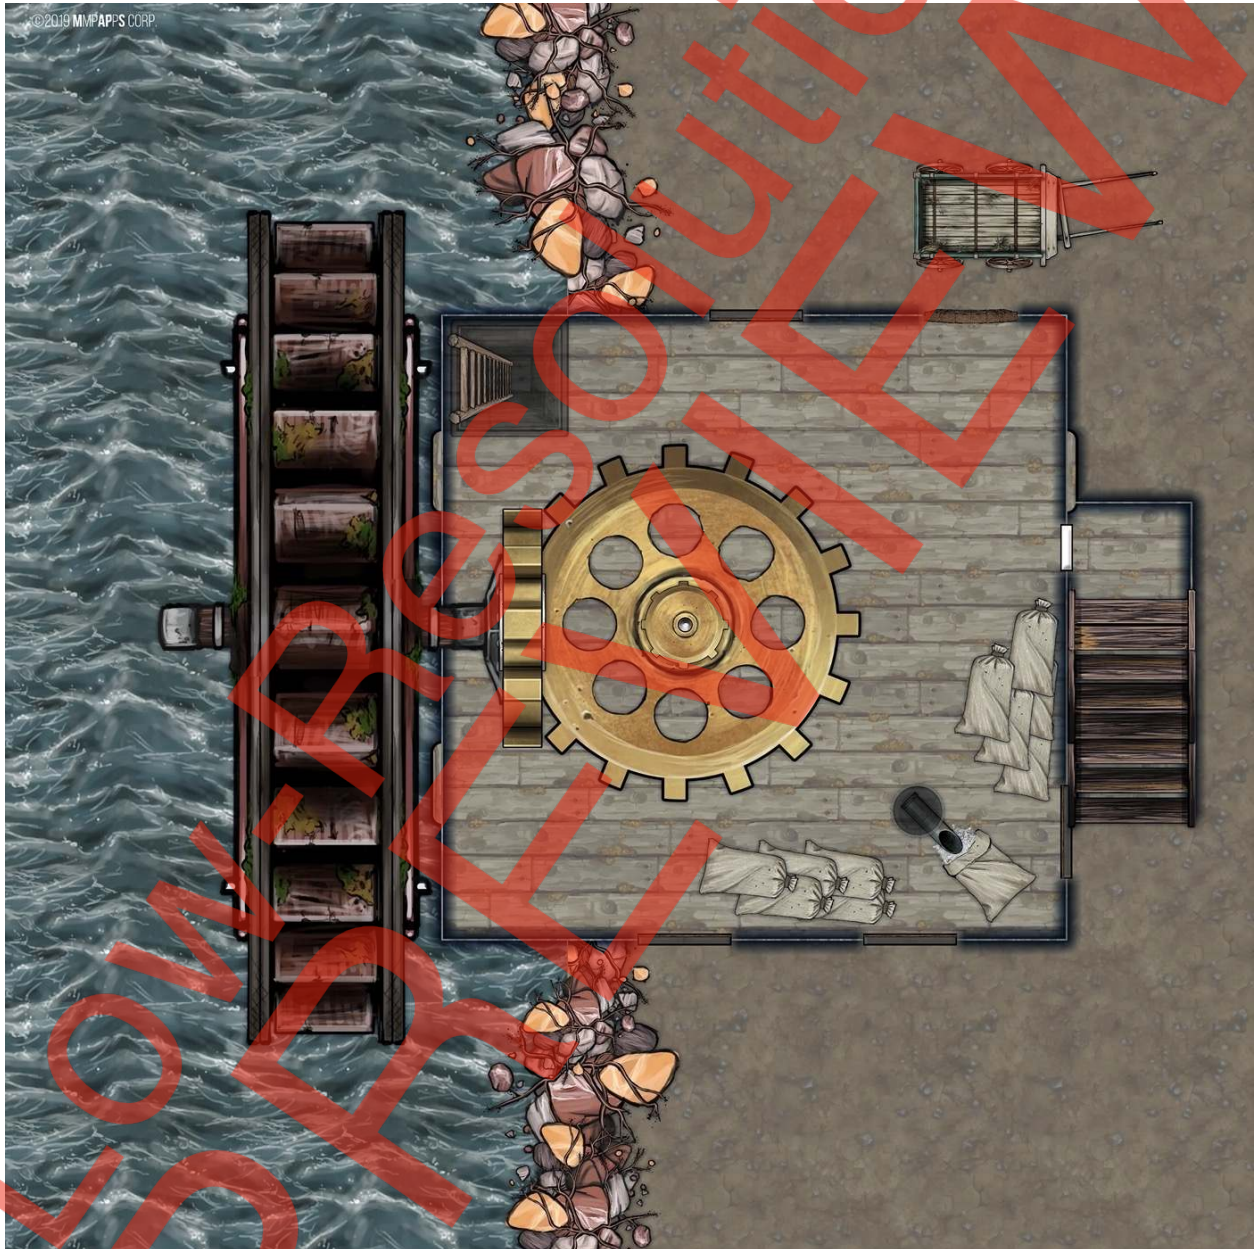

Wind Mill

1. Underneath
2. Grind Floor
3. Loading Floor
4. Wheel Floor
5. Roof

VTT Settings: (each unit is 70 pixels)
Page Size: 20 units wide by 20 units high
Scale: 1 unit = 1 m (or 3 ft.)
Grid Size: 1 units

Water Mill - Wheel Floor

The turning water wheel turns a huge gear with turns the milling stones on the floor above.
Ground floor falls from the floor above and is bagged on this level.

Water Mill - Grind Floor

This is where the grain is ground into flour between massive milling stones. Grain is loaded from the floor above and flour drops down to the floor below.

Water Mill - Loading Floor

Here a block-and-tackle loads grain from below in large sacks. The grain is then dropped into the milling stones on the floor below.

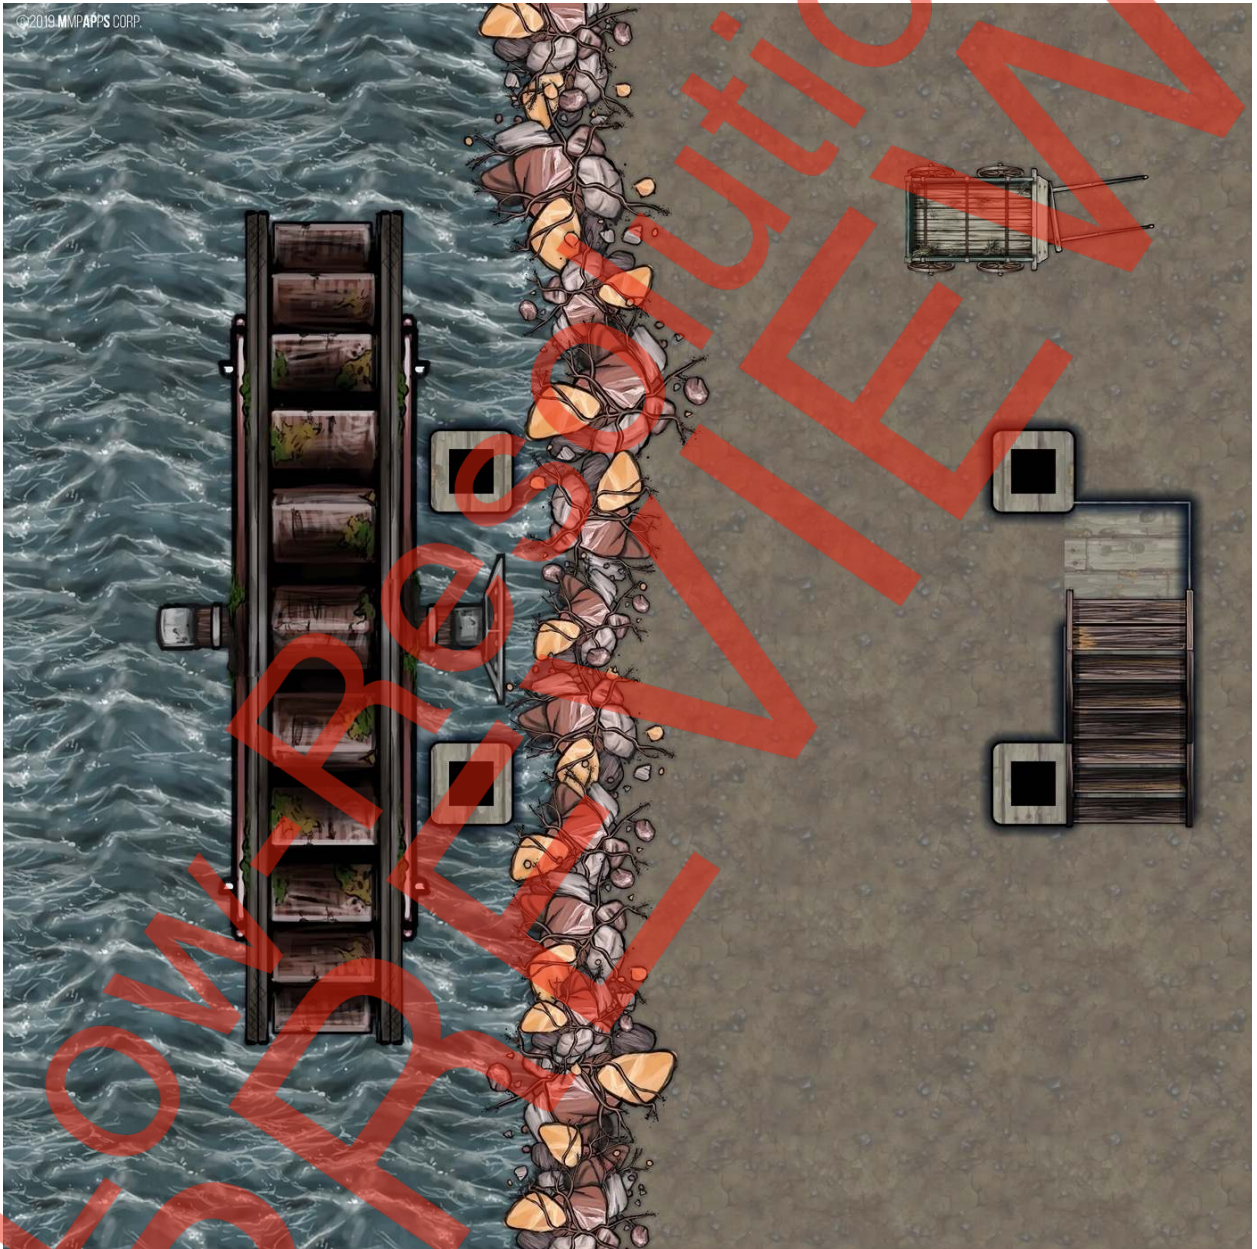

Water Mill - Roof

Water Mill - Underneath

The mill is build on stilts and can be walked underneath.

Wind Mill - Wheel Floor

Massive sails catch the wind and spin a huge gear that spins the milling stones two floors below.

Wind Mill - Loading Floor

Here a block-and-tackle loads grain from below in large sacks. The grain is then dropped into the milling stones on the floor below.

Wind Mill - Grind Floor

This is where the grain is ground into flour between massive milling stones. Grain is loaded from the floor above and flour drops into bags here.

Wind Mill - Roof

This is where the grain is ground into flour between massive milling stones. Grain is loaded from the floor above and flour drops into bags here.

For each location, maps are provided for:

- With grid and without grid
