

Weapons – Character Scale

NAME	COST	WEIGHT	DESCRIPTION
Hold-Out Blaster	150	2	Compact, easily concealed energy pistol. Short range, low power.
Light Blaster Pistol	250	3	Standard sidearm of civilian and security forces. Reliable and common.
Heavy Blaster Pistol	400	4	Greater stopping power and range, but heavier and louder.
Blaster Carbine	800	7	Military-grade short rifle for infantry or guards.
Blaster Rifle	1.2 K	9	Long-range, high-energy infantry weapon.
Sniper Blaster	2 K	10	Scoped precision energy rifle with long-barrel cooling.
Repeating Blaster	3 K	16	Squad-support weapon with rapid-fire plasma discharge.
Ion Pistol	500	3	Disables bots and electronics; low harm to organics.
Ion Rifle	1 K	8	Long-range ion disruptor, effective against shields and machines.
Disruptor Pistol	2 K	3	Illegal weapon that disintegrates living tissue. Banned in most systems.
Disruptor Rifle	4 K	8	Terrifying outlaw weapon with high armor penetration.
Stun Blaster	300	4	Non-lethal variable-intensity weapon for law enforcement.
Pulse Carbine	1.5 K	8	Fires magnetically contained plasma bolts; efficient and accurate.
Energy Scattergun	1 K	9	Short-range blast weapon; devastating in close quarters.
Vibroknife	100	1	Electrically vibrating blade for armor penetration in melee.
Vibrosword	500	6	Full-length powered blade favored by mercenaries and nobles.
Vibro-Axe	800	12	Brutal heavy weapon that can cleave armor.
Electrostaff	1 K	9	Dual-ended melee weapon capable of blocking energy blades.
Energy Sword	5 K	3	Rare, elegant plasma blade; extremely lethal and prestigious.
Force Pike	700	10	Collapsible staff with shock tip, used by elite guards.

NAME	COST	WEIGHT	DESCRIPTION
Thermal Detonator	2 K	2	Compact spherical explosive with variable yield.
Fragmentation Grenade	150	1	Standard explosive with shrapnel dispersion.
Ion Grenade	200	1	Disables electronics, vehicles, and bots.
Smoke Grenade	50	1	Creates dense cover cloud for 30 seconds.
Flashbang Grenade	75	1	Blinds and disorients organic targets.
Needler Pistol	300	2	Fires chemical darts; silent and concealable.
Slugthrower Pistol	100	3	Ballistic firearm; primitive but immune to EMP/ion effects.
Slug Rifle	250	8	Chemical-propellant rifle, often used on frontier worlds.
Plasma Caster	3 K	15	Shoulder-mounted launcher firing superheated plasma bolts.
Heavy Repeater Cannon	8 K	30	Crew-served weapon with tripod; requires strength or support rig.

Weapons - Vehicle Scale

NAME	COST	WEIGHT	DESCRIPTION
Light Blaster Cannon	10 K	1 K	Compact energy cannon for light speeders and patrol craft.
Twin Blaster Mount	15 K	1.5 K	Dual-linked blasters for improved rate of fire.
Heavy Blaster Cannon	25 K	2 K	Standard offensive mount for armored transports.
Rotary Blaster Turret	40 K	3 K	Multi-barrel energy weapon for rapid suppression fire.
Ion Cannon (Light)	20 K	2 K	Disables vehicle systems without destroying them.
Ion Cannon (Heavy)	45 K	3.5 K	High-powered variant used on heavy walkers or gunships.
Laser Repeater Array	30 K	2.5 K	Multi-emitter setup for continuous-fire capability.
Mass Driver (Light)	25 K	3 K	Magnetic accelerator firing solid projectiles; armor-piercing.
Mass Driver (Heavy)	50 K	6 K	Vehicle-mounted kinetic cannon, very high recoil.
Rocket Pod (4-Tube)	15 K	1 K	Fires guided micro-rockets; reloadable.
Rocket Pod (12-Tube)	35 K	2.5 K	Standard gunship armament for ground support.
Missile Launcher (Guided)	25 K	1.2 K	Fires smart missiles with tracking capability.

NAME	COST	WEIGHT	DESCRIPTION
Missile Rack (4 Missiles)	45 K	3 K	Mounted rack with rapid sequential launch system.
Plasma Projector (Light)	30 K	2 K	Fires superheated plasma bolts; devastating but energy-intensive.
Plasma Projector (Heavy)	75 K	4 K	Used by assault walkers and siege vehicles.
Flame Projector (Vehicle)	10 K	1.5 K	Projects ionized fuel streams; short range, effective vs infantry.
Concussion Grenade Launcher	12 K	1 K	Belt-fed explosive launcher for anti-personnel use.
Mortar System (Smart)	25 K	2 K	Indirect-fire weapon using guided shells.
Seismic Charge Launcher	100 K	5 K	Deploys resonant explosives that devastate terrain and structures.
EMP Launcher	40 K	2.5 K	Fires electromagnetic pulses disabling electronics within radius.
Tractor Beam Projector (Short Range)	50 K	3 K	Immobilizes or drags light vehicles or cargo.
Defensive Smoke Ejector Array	5 K	0.5 K	Creates cover clouds to block sensors and visuals.
Countermeasure Launcher	8 K	0.8 K	Deploys chaff/flares to confuse targeting systems.
Autoturret (Remote)	20 K	1.5 K	Automated turret with target tracking and friend/foe ID.
Autoturret (Twin-Barrel)	35 K	2 K	Advanced AI-controlled weapon system with dual barrels.
Mine Layer (Vehicle)	30 K	2.5 K	Dispenses timed or proximity-detonated charges.
Harpoon Gun (TowGrade)	8 K	1 K	Fires grappling harpoons for towing or immobilizing targets.
Sonic Cannon (Wideband)	25 K	2 K	Emits powerful concussive waves, disabling soft targets.
Laser Cutter Arm	15 K	1.5 K	Industrial-grade laser adapted for combat and breaching.
Magneto Grenade Dispenser	10 K	1 K	Fires magnetically adhesive grenades for anti-armor use.

Weapons - Starship Scale

NAME	COST	WEIGHT	DESCRIPTION
Light Laser Cannon	100 K	5 K	Standard single-barrel ship cannon for dogfights.
Twin Laser Cannon	150 K	7 K	Dual synchronized lasers; staple starfighter armament.
Quad Laser Turret	250 K	10 K	Common defensive turret on freighters and transports.
Heavy Laser Cannon	400 K	15 K	Long-range, high-output beam for corvettes and escorts.
Turbolaser (Light)	800 K	30 K	Stripped-down capital-grade weapon for large starfighters.
Ion Cannon (Starship)	300 K	12 K	Neutralizes shields and systems without hull damage.
Dual Ion Turret	450 K	18 K	Rotating twin-ion setup for system disruption.
Proton Torpedo Launcher (2-Tube)	200 K	8 K	Fires guided warheads; standard bomber payload.
Proton Torpedo Launcher (6-Tube)	400 K	15 K	Multi-tube launcher for sustained strikes.
Concussion Missile Launcher (4-Pack)	300 K	10 K	Anti-fighter missile rack with lock-on guidance.
Concussion Missile Pod (16-Pack)	600 K	20 K	Heavy launcher for frigates and bombers.
Plasma Cannon (Ship-Grade)	500 K	18 K	Fires magnetically confined plasma bolts; massive energy draw.
Mass Driver Turret	700 K	25 K	Coil-accelerator cannon firing dense slugs; shield-piercing.
Railgun Array	1 M	40 K	Multi-stage magnetic accelerator; superb hull penetration.
Pulse Laser Battery	600 K	20 K	Fires rapid short-pulse beams to overwhelm shields.
Auto-Tracking Laser Turret	350 K	12 K	Compact AI-controlled defense turret.
Defensive Point-Defense Laser	200 K	8 K	Anti-missile/anti-fighter beam system.
Seismic Charge Launcher (Ship)	900 K	35 K	Launches high-frequency resonance explosives; devastating radius.
EMP Discharger Array	500 K	18 K	Projects wide-area electromagnetic pulse.

NAME	COST	WEIGHT	DESCRIPTION
Tractor Beam Projector (Starship)	300 K	15 K	Captures or slows small craft and cargo.
Gravity Well Generator (Miniature)	1.5 M	50 K	Prevents nearby ships from entering hyperspace.
Thermal Lance Turret	1 M	45 K	Continuous-beam energy cutter for hull breaching.
Ion Mine Dispenser	250 K	10 K	Deploys magnetic mines that disable systems.
Decoy Drone Launcher	150 K	6 K	Releases autonomous sensor-spoofing drones.
Flak Burst Cannon	400 K	15 K	Explosive-shell weapon for area denial against fighters.
Magneto-Plasma Howitzer	1.2 M	60 K	Combines plasma and rail tech for extreme impact.
Heavy Rocket Pod (24 Rockets)	350 K	18 K	Semi-guided munitions for close-range assaults.
Torpedo Autoloader System	500 K	20 K	Automated reload mechanism for torpedo tubes.
Directed Energy Array (Phalanx Type)	900 K	30 K	Rotating emitter cluster providing all-angle defense.
Quantum Lance Cannon	2 M	80 K	Experimental beam weapon using phased-energy harmonics.

Weapons - Capital Ship Scale

NAME	COST	WEIGHT	DESCRIPTION
Light Turbolaser Battery	5 M	200 K	Standard capital-grade anti-starfighter turret array.
Medium Turbolaser Battery	10 M	400 K	Ship-to-ship energy cannon bank; the fleet workhorse.
Heavy Turbolaser Battery	25 M	800 K	Devastating long-range energy weapon for cruisers.
Super-Heavy Turbolaser Array	60 M	2 M	Multi-emitter siege array capable of cracking hull plating.
Ion Cannon Battery	15 M	500 K	System-disabling beam network effective against shields.
Dual Ion Cannon Array	25 M	900 K	Coordinated pair of high-output ion emitters.
Mass Driver Cannon	30 M	1 M	Gigantic kinetic accelerator for armor-piercing bombardment.
Quad Mass Driver Battery	75 M	2.5 M	Linked magnetic launchers for rapid orbital fire.

NAME	COST	WEIGHT	DESCRIPTION
Plasma Lance Cannon	40 M	1.2 M	Sustained-beam plasma projector; extreme heat yield.
Particle Beam Turret	50 M	1.5 M	Emits compressed particle streams; bypasses some shielding.
Heavy Railgun Array	80 M	3 M	Magnetic acceleration battery firing tungsten slugs at hypersonic speeds.
Super Railgun Cannon	150 M	5 M	Dreadnought-class kinetic weapon with intercontinental reach.
Proton Torpedo Launcher (Heavy)	20 M	700 K	Capital torpedo system for large-scale bombardment.
Concussion Missile Battery	30 M	900 K	Rapid-fire guided warheads for fleet engagements.
Seismic Charge Ejector	60 M	2 M	Deploys massive resonance explosives; catastrophic in atmosphere.
Graviton Beam Projector	90 M	2.5 M	Manipulates gravity fields to crush enemy hulls.
Tractor Beam Array (Long Range)	25 M	1 M	Secures or drags smaller vessels; useful for boarding.
Shield-Breaker Cannon	100 M	3 M	Specialized beam tuned to overload deflector harmonics.
EMP Pulse Projector	40 M	1 M	Wide-area electronic suppression field generator.
Point-Defense Cluster Turret	10 M	300 K	Dense laser grid to intercept fighters and missiles.
Heavy Point-Defense Matrix	25 M	700 K	Coordinated AI-linked defensive network.
Ion Mine Deployment System	20 M	800 K	Launches mines that disable entire squadrons.
Orbital Bombardment Cannon	75 M	2 M	Designed for surface strikes; adjustable yield.
Planetary Siege Laser	200 M	6 M	Siege-class beam capable of glassing surface targets.
Antimatter Missile Rack	150 M	4 M	Catastrophically destructive warheads; extreme rarity.
Nova Plasma Mortar	100 M	3 M	Fires slow, radiant plasma globes; high area damage.
Quantum Disruptor Array	250 M	8 M	Experimental phased-energy weapon destabilizing matter bonds.
Doomsday Beam Cannon	500 M	15 M	Super-capital superweapon; devastates fleets or cities.

NAME	COST	WEIGHT	DESCRIPTION
Orbital Defense Platform Battery	1 B	50 M	Fixed emplacement with multiple heavy arrays; station-mounted.

Bots

NAME	COST	WEIGHT	DESCRIPTION
Utility Bot (Mini)	500	20	Compact helper for cleaning, minor maintenance, and errands.
Service Bot	1 K	50	General-purpose assistant for hospitality and domestic work.
Protocol Bot	2 K	80	Fluent translator and etiquette specialist; humanoid form.
Astromech Bot	3 K	120	Starship navigation, repair, and computer interface unit.
Mechanic Bot	4 K	150	Equipped with welding tools and diagnostic scanners.
Medical Bot (Compact)	5 K	100	Performs field triage and basic surgery.
Medical Bot (Full)	10 K	200	Fully autonomous surgeon with extensive databases.
Security Bot (Light)	2.5 K	130	Patrol and guard model with stun weaponry.
Security Bot (Heavy)	8 K	300	Combat-capable enforcer with reinforced armor plating.
Battle Bot (Standard)	6 K	250	Infantry-grade AI with ranged weapon integration.
Battle Bot (Elite)	15 K	400	Heavily armored, tactical programming, independent command routines.
Assassin Bot	25 K	200	Advanced infiltration and termination model; outlawed.
Recon Bot	1.5 K	80	Small, mobile drone for scouting and reconnaissance.
Survey Bot	3 K	150	Geologic and atmospheric analysis platform.
Repair Drone (Micro)	1 K	50	Swarmable maintenance bot for hulls and vehicles.
Repair Bot (Full)	4 K	200	Dedicated maintenance machine with full manipulator suite.
Cargo Loader Bot	2 K	500	Industrial lifter capable of handling heavy freight.
Dockyard Bot	6 K	1 K	Supervises and coordinates starport cargo and refueling ops.

NAME	COST	WEIGHT	DESCRIPTION
Pilot Bot	8 K	250	Autonomous starship pilot with flight data library.
Navigation Bot	5 K	150	Specializes in astrochart plotting and route optimization.
Communications Bot	3 K	180	Maintains comm networks and signal encryption relays.
Steward Bot	1.5 K	120	Designed for luxury travel service; etiquette and cuisine programs.
Entertainment Bot	1 K	100	Music, humor, and performance programming.
Companion Bot	4 K	140	Social interaction model for companionship or therapy.
Agricultural Bot	2 K	200	Manages crops, soil, and irrigation systems.
Mining Bot	7 K	400	Extracts and refines raw minerals; ruggedized design.
Construction Bot	10 K	600	Heavy-duty builder with modular tool arms.
Tactical Command Bot	20 K	350	Coordinates bot squads and transmits battlefield data.
Research Bot	12 K	180	Analytical AI for laboratory, archeology, or xenobiology.
Custom Bot (Prototype)	30 K	250	Tailor-built unit with unique programming or functions.

Vehicles

NAME	COST	WEIGHT	DESCRIPTION
Hover Bike	5 K	1 K	Single-rider repulsorlift vehicle for fast travel.
Dual-Seat Speeder Bike	7 K	1.5 K	Tandem model with small cargo rack and increased range.
Hover Car (Civilian)	10 K	3 K	Compact urban vehicle for short-range transport.
Hover Car (Luxury)	25 K	4 K	Sleek, high-comfort personal speeder for executives.
Ground Car (Wheeled)	8 K	3 K	Simple ground-based vehicle, common on lower-tech worlds.
Utility Speeder	12 K	4 K	Open-bed hover truck for cargo or crew transport.
Cargo Hauler (Light)	20 K	10 K	Repulsorlift flatbed for small-scale shipping.
Cargo Hauler (Heavy)	50 K	25 K	Industrial freight platform for planetary transport.

NAME	COST	WEIGHT	DESCRIPTION
Security Patrol Speeder	15 K	5 K	Law enforcement vehicle with sirens, armor, and sensors.
Armored Troop Carrier	60 K	35 K	Enclosed hover APC for military operations.
Recon Speeder	12 K	2 K	Lightweight scout vehicle with advanced sensors.
Combat Speeder	40 K	12 K	Weaponized vehicle with blaster mounts and shielding.
Hover Tank (Light)	80 K	60 K	Light armored vehicle for battlefield mobility.
Hover Tank (Heavy)	150 K	120 K	Full battle tank with deflector shielding and heavy guns.
Construction Hauler	30 K	20 K	Utility vehicle for transport and material handling.
Mining Transporter	25 K	18 K	Heavy-duty hauler designed for raw material delivery.
Survey Rover	18 K	8 K	All-terrain vehicle for planetary exploration.
Research Rover (Pressurized)	40 K	15 K	Sealed cabin rover for environmental hazards.
Agricultural Skimmer	10 K	12 K	Crop maintenance vehicle using low-level repulsorlift.
Tow Speeder	15 K	10 K	Industrial vehicle with tractor beam hook for recovery work.
Courier Speeder	9 K	2 K	Fast, unarmed courier for short-distance delivery.
Luxury Transport (Ground)	100 K	20 K	High-end personal hover limousine with AI chauffeur.
Mobile Workshop Van	35 K	18 K	Rolling repair bay for mechanics and engineers.
Medical Speeder Ambulance	40 K	15 K	Rapid-response medical transport with auto-doc bay.
Police Interceptor Speeder	45 K	10 K	High-speed law enforcement pursuit vehicle.
Sand Skimmer	20 K	9 K	Wide-surface hovercraft designed for desert terrain.
Snow Glider	18 K	8 K	Low-friction repulsor sled for frozen environments.
Swamp Crawler	22 K	10 K	Amphibious transport able to navigate water and marsh.
Grav Hauler (Heavy Industrial)	200 K	100 K	Enormous floating hauler for mining or port operations.
Personal Walker (1-Man)	60 K	20 K	Compact bipedal mech used for labor or combat.

Starships

NAME	COST	WEIGHT	DESCRIPTION
Escape Pod	5 K	10 K	Emergency craft with life support for up to 48 hours.
Orbital Shuttle (Short-Range)	50 K	150 K	Planet-to-orbit passenger and cargo transport.
Orbital Shuttle (Luxury)	120 K	180 K	High-comfort VIP shuttle with steward AI-bot.
Cargo Shuttle	80 K	200 K	Heavy-lift craft for short-haul freight operations.
Scout Ship	150 K	250 K	Two-person long-range reconnaissance vessel.
Starfighter (Light)	200 K	300 K	Agile one-seat combat craft with light laser cannon.
Starfighter (Heavy)	400 K	450 K	Twin-engine fighter with missile rack and shield array.
Interceptor	600 K	350 K	Fast pursuit craft with high-output engines and deflectors.
Bomber (Medium)	800 K	600 K	Multi-crew strike ship with heavy ordnance capacity.
Dropship (Assault)	1 M	900 K	Armored transport for planetary troop insertion.
Personal Yacht	1.5 M	1 M	Private leisure starship with luxurious living quarters.
Light Freighter (Civilian)	2 M	1.2 M	Small cargo ship with modest weapons and crew quarters.
Medium Freighter	4 M	2 M	Popular trade vessel with upgraded cargo capacity.
Heavy Freighter	6 M	3.5 M	Massive hauler for bulk goods; requires full crew.
Gunship (Escort)	3 M	2 M	Combat ship with turreted weapons and armor plating.
Corvette (Light)	8 M	5 M	Multi-deck starship for small crews and patrol duties.
Corvette (Heavy)	12 M	6 M	Enhanced version with dual shields and torpedo tubes.
Research Vessel	5 M	4 M	Laboratory-equipped exploration craft.
Mining Barge	7 M	5 M	Industrial ship for asteroid extraction and refinement.
Medical Frigate	9 M	6 M	Hospital ship with multiple auto-doc bays and AI triage.

NAME	COST	WEIGHT	DESCRIPTION
Passenger Liner (Regional)	10 M	8 M	Medium interstellar passenger vessel with cabins and dining deck.
Passenger Liner (Luxury)	20 M	10 M	High-end cruise ship for the wealthy elite.
Stealth Corvette	15 M	5 M	Recon vessel with low-signature hull and sensor masking.
Smuggler's Freighter	8 M	4 M	Fast cargo ship with hidden compartments and jammers.
Heavy Gunboat	14 M	7 M	Fire-support craft for fleet skirmishes.
Tugboat	3 M	3 M	Utility vessel with tractor beams for towing or salvage.
Colony Transport	25 M	20 M	Massive long-haul ship capable of carrying settlers and cargo.
Explorer Cruiser	18 M	9 M	Long-range vessel with self-sustaining systems.
Blockade Runner	22 M	8 M	Reinforced engines for outrunning patrols; lightly armed.
Diplomatic Envoy Ship	30 M	10 M	Elegant government craft with ceremonial chambers.
Custom Starship (Unique Build)	50 M	12 M	Individually engineered masterpiece; capabilities vary.

Capital Ships

NAME	COST	WEIGHT	DESCRIPTION
Patrol Frigate	80 M	50 M	Small capital ship used for border defense and convoy escort.
Escort Destroyer	150 M	100 M	Mid-sized warship with heavy armor and multiple turrets.
Assault Destroyer	300 M	150 M	Upgraded variant built for planetary bombardment.
Strike Cruiser	500 M	200 M	Balanced long-range vessel with strong armament and hangars.
Heavy Cruiser	800 M	350 M	Backbone of most navies; formidable range and defense.
Battlecruiser	1 B	400 M	Capital strike ship combining speed with powerful weapons.
Carrier (Light)	1.2 B	450 M	Deploys 24–36 starfighters; mid-range armor and shields.
Carrier (Heavy)	2 B	600 M	Flagship-scale craft carrying 100+ strike craft.

NAME	COST	WEIGHT	DESCRIPTION
Dreadnought	3 B	800 M	Gigantic line warship; bristling with turbolasers and batteries.
Super Dreadnought	6 B	1.2 B	Vast capital ship capable of fleet-level engagements alone.
Command Cruiser	2.5 B	900 M	Fleet coordination ship with advanced sensors and communications.
Siege Cruiser	1.5 B	700 M	Designed for orbital bombardment and siege operations.
Stealth Cruiser	900 M	500 M	Experimental vessel using gravitic dampening fields.
Carrier Dreadnought	5 B	1 B	Combines carrier capacity with dreadnought firepower.
Missile Cruiser	700 M	350 M	Long-range capital ship specializing in guided munitions.
Defense Platform (Mobile)	4 B	1.5 B	Semi-stationary fortress ship with massive defenses.
Planetary Assault Ship	2 B	1 B	Drops troops, vehicles, and support craft for invasions.
Medical Capital Ship	1.5 B	800 M	Deep-space hospital ship for humanitarian or military use.
Colony Ship (Large)	3 B	1.2 B	Self-sustaining ship transporting thousands of settlers.
Terraformer Vessel	8 B	2 B	Planet-modification capital ship deploying atmospheric arrays.
Science Vessel (Grand)	1 B	600 M	Deep-space exploration ship with advanced research decks.
Carrier Superstructure	10 B	3 B	Floating city-sized carrier capable of housing entire fleets.
Flagship (Empire Class)	15 B	4 B	Command vessel representing military and political power.
Mobile Shipyard	20 B	5 B	Industrial vessel capable of constructing other ships.
Colony Ark Ship	25 B	6 B	Multi-generational ship with self-contained ecosystems.
Planetary Defense Station (Orbital)	40 B	8 B	Station-class defensive bastion housing hundreds of weapons.
Orbital Fortress	75 B	10 B	Fixed or semi-mobile structure for system defense.
Titan-Class Battleship	100 B	12 B	Largest mobile warship class; nearly unstoppable.

NAME	COST	WEIGHT	DESCRIPTION
Supercarrier (Fleet Command)	150 B	15 B	Houses multiple fleets and planetary command centers.
Worldship	500 B	50 B	A city-world adrift in space; civilization unto itself.
Starbreaker Vessel	1 T	100 B	Cataclysmic supercapital designed to fracture planets.

Components – Character Scale (for Bots)

NAME	COST	WEIGHT	DESCRIPTION
Power Cell (Bot-Grade)	250	2	Standard rechargeable power source for light AI-Bots.
Fusion Micro-Core	2 K	5	Compact reactor for high-end or combat bots.
Servo Armature (Standard)	400	10	Articulated limb assembly for general service or repair bots.
Servo Armature (Heavy-Duty)	1 K	20	Reinforced hydraulic limb for lifting or melee bots.
Gyroscopic Stabilizer	500	3	Keeps balance during movement or recoil.
Optical Sensor Array	800	1	Visual and infrared input system; upgradeable lenses optional.
Audio Sensor Array	400	1	Directional microphones and processors for hearing and speech recognition.
Tactile Sensor Mesh	700	2	Touch and pressure sensors for delicate work or empathy units.
Neural Processor (Basic)	1 K	2	Entry-level logic core for simple task automation.
Neural Processor (Advanced)	5 K	2	Multithreaded cognition engine for adaptive AI.
Cognitive Core (Synthetic Personality)	25 K	3	High-end AI unit capable of emotional simulation.
Quantum Logic Matrix	100 K	4	Experimental AI brain with near-sentient learning capacity.
Memory Module (Standard)	200	0.5	50 teracycle storage for data and subroutines.
Memory Module (Extended)	800	1	Long-term adaptive storage with redundancy.
Chassis Frame (Light Alloy)	1 K	30	Lightweight humanoid or wheeled body shell.

NAME	COST	WEIGHT	DESCRIPTION
Chassis Frame (Combat-Grade)	4 K	50	Reinforced exoskeleton built to withstand direct hits.
Armor Plating (Composite)	2 K	25	Defensive shell upgrade for combat bots.
Manipulator Hand (Fine)	500	2	Multi-digit actuator capable of delicate movements.
Manipulator Claw (Industrial)	800	5	Heavy claw suited for cargo handling or combat grabs.
Locomotion System (Treaded)	1 K	40	Durable all-terrain movement assembly.
Locomotion System (Hover)	5 K	30	Antigrav platform for smooth navigation.
Power Distributor Node	300	1	Directs energy from reactor to limbs and tools.
Cooling System (Liquid)	500	3	Prevents overheating during continuous operation.
Interface Port Array	400	1	Allows bot to connect with tools, terminals, or vehicles.
Commlink Transceiver	600	1	Enables wireless coordination and remote control.
Holo-Projector Node	1 K	2	Projects holographic displays or communication avatars.
Voice Synthesizer Unit	300	1	Provides speech output and tonal customization.
Programming Module (Basic Tasks)	200	—	Pre-loaded subroutines for cleaning, repair, or assistance.
Programming Module (Tactical)	1 K	—	Combat or guard routines for security models.
Emotion Emulator Chip	2 K	0.5	Simulates emotional responses and empathy parameters.
Cognition Firewall Module	3 K	1	Prevents hacking, reprogramming, or sentience drift.
Mag-Grip Pads (Set)	300	1	Allows wall and ceiling traversal in low gravity.
Sensor Jammer Array	2 K	4	Confuses enemy scanners and detection systems.
Stealth Coating (Adaptive)	5 K	10	Light-bending exterior for infiltration bots.
Tool Mount (Universal)	150	0.5	Attachment bracket for external devices.
Weapon Mount (Modular)	600	2	Hardpoint for ranged or melee weapons.
Repair Drone Swarm Bay	10 K	15	Deploys micro-drones for maintenance and self-repair.

NAME	COST	WEIGHT	DESCRIPTION
Core Uplink Transceiver	4 K	3	Links bot to centralized AI or network overseer.
Black-Market Personality Core	15 K	2	Illegally modified, unpredictable AI matrix with emergent behavior.

Components – Vehicle Scale

NAME	COST	WEIGHT	DESCRIPTION
Repulsorlift Engine (Light)	20 K	3 K	Standard hover-drive for speeders and small transports.
Repulsorlift Engine (Heavy)	40 K	6 K	Lift engine for cargo haulers and troop carriers.
Ground Tread Assembly	10 K	5 K	Durable wheel/tread system for rugged terrain.
Walker Leg System (Light)	25 K	8 K	Bipedal actuator legs for light walkers.
Walker Leg System (Heavy)	80 K	15 K	Reinforced leg system for large combat mechs.
Thruster Pod (Short-Range)	30 K	4 K	Sub-orbital flight pod used in gunships and shuttles.
Maneuvering Thrusters (Precision)	15 K	2 K	Fine control array for atmospheric craft.
Hover Stabilizer Array	10 K	1 K	Keeps repulsor vehicles stable over uneven surfaces.
Deflector Shield (Vehicle)	50 K	3 K	Light energy field for small ground or air vehicles.
Energy Reactor (Compact)	25 K	5 K	Power source for speeders and utility vehicles.
Fuel Cell Module	15 K	2 K	Replaceable compact energy cell for short-range vehicles.
Sensor Array (Ground)	12 K	2 K	Detects terrain hazards and lifeforms.
Communications Node (Vehicle)	8 K	1 K	Radio/subspace uplink for short-range operations.
Auto-Pilot Module	10 K	3 K	Handles routine travel and course correction.
Targeting Computer (Vehicle)	20 K	4 K	Improves gunnery and missile accuracy for light vehicles.
Cargo Bay Expansion (Vehicle)	15 K	5 K	Adds storage space to ground or hover transports.
Life Support Unit (Compact)	8 K	3 K	Basic oxygen and environmental system for vehicles.
Landing Gear Assembly	12 K	3 K	Retractable system for shuttles and freighters.
Vehicle AI Core	40 K	5 K	Semi-sentient control unit for autonomous navigation.

NAME	COST	WEIGHT	DESCRIPTION
Armored Hull Upgrade (Light)	25 K	8 K	Reinforced plating to increase hull durability.
Thruster Upgrade Kit	35 K	6 K	Boosts acceleration and maneuverability for small craft.

Components – Starship Scale

NAME	COST	WEIGHT	DESCRIPTION
Sublight Engine (Light)	100 K	20 K	Standard propulsion system for small craft and shuttles.
Sublight Engine (Heavy)	300 K	40 K	High-output thruster array for freighters and corvettes.
Ion Drive Cluster	800 K	60 K	Efficient, long-range propulsion using ionized plasma.
Fusion Drive Array	1.5 M	80 K	Heavy-duty power thrusters for starships and escorts.
Antimatter Drive	5 M	100 K	Experimental propulsion system with enormous power yield.
Hyperdrive (Class 1)	500 K	25 K	Standard FTL system used by most small ships.
Hyperdrive (Class 0.5)	1 M	35 K	Advanced drive allowing rapid system-to-system travel.
Backup Hyperdrive (Class 2)	250 K	20 K	Secondary slower unit used in emergencies.
Deflector Shield Generator (Light)	300 K	30 K	Defensive bubble protecting fighters and freighters.
Deflector Shield Generator (Heavy)	1 M	50 K	Full-coverage energy shielding for corvettes and cruisers.
Reinforced Shield Matrix	2 M	60 K	Multilayered field generator with power distribution control.
Energy Reactor (Standard)	400 K	25 K	Core energy source for small vessels and systems.
Energy Reactor (Fusion Core)	1.2 M	40 K	Stable reactor core with high power output.
Power Distributor Array	200 K	15 K	Balances energy between shields, weapons, and engines.
Sensor Suite (Long-Range)	350 K	20 K	Scans ships, terrain, and subspace activity.
Advanced Sensor Suite	800 K	30 K	Military-grade scanning and targeting system.
Communications Array (Subspace)	300 K	20 K	Enables faster-than-light transmissions across systems.

NAME	COST	WEIGHT	DESCRIPTION
Navigation Computer (Basic)	150 K	10 K	Stores hyperspace routes and coordinates.
Navigation Computer (Advanced)	400 K	15 K	AI-assisted plotting with real-time obstacle avoidance.
Life Support System (Standard)	200 K	15 K	Provides oxygen, temperature, and humidity control.
Life Support System (Extended)	600 K	25 K	Long-duration environment control for multi-week voyages.
Gravity Generator	500 K	30 K	Creates artificial gravity within ship decks.
Docking Clamp Array	100 K	10 K	Standardized system for mooring to stations or ships.
Cargo Bay Expansion Module	250 K	25 K	Adds or expands internal freight space.
Weapon Mounting Hardpoint	150 K	12 K	Reinforced hull mounting for additional armament.
Repair Bay (Automated)	2 M	80 K	Self-sustaining drone and repair station system.
Medical Bay (Standard)	800 K	40 K	Integrated med station with bacta tanks and auto-docs.
Luxury Cabin Module	500 K	30 K	Private living quarters with premium furnishings.
AI Core Interface Bay	4 M	70 K	Installs a ship-scale artificial intelligence for operations.

Components – Capital Ship Scale

NAME	COST	WEIGHT	DESCRIPTION
Main Reactor Core (Fusion)	10 M	1 M	Primary power source generating energy for shipwide systems.
Antimatter Reactor Core (Advanced)	50 M	2 M	Ultra-efficient drive core providing immense power output.
Quantum Singularity Reactor	200 M	3 M	Experimental core drawing energy from micro black holes.
Main Engine Array (Heavy Sublight)	25 M	800 K	Massive propulsion cluster for maneuvering large vessels.
Hyperdrive (Capital Class)	30 M	1 M	Long-range FTL system for dreadnought-scale vessels.
Auxiliary Drive Core	8 M	400 K	Backup engine network maintaining maneuverability under damage.

NAME	COST	WEIGHT	DESCRIPTION
Primary Shield Generator	40 M	600 K	Generates a multi-layered deflector field over kilometers of hull.
Reinforced Shield Matrix (Fleet Grade)	100 M	800 K	Overlapping defense network protecting entire battle groups.
Armor Plating (Titanium Composite)	20 M	2 M	Heavy ablative hull armor against energy and kinetic impacts.
Armor Plating (Neutronium-Layered)	75 M	4 M	Nearly indestructible layered armor for flagship protection.
Weapon Battery (Heavy Turbolaser Array)	15 M	400 K	Multi-turret system for anti-ship combat.
Weapon Battery (Ion Cannon Array)	12 M	350 K	EMP-style weapons disabling enemy systems.
Missile Pod Cluster (Long-Range)	10 M	300 K	Guided ordnance for distant bombardment.
Planetary Bombardment Cannon	50 M	1 M	Siege weapon capable of devastating surface targets.
Point Defense Grid	5 M	150 K	Automated anti-fighter and anti-missile defense network.
Hangar Bay (Standard)	25 M	1 M	Supports squadrons of fighters or shuttles.
Hangar Bay (Grand Carrier)	100 M	3 M	Holds hundreds of small craft and refit facilities.
Command Bridge Module	8 M	300 K	Main control and coordination center of the vessel.
Command Tower (Flagship)	25 M	800 K	Reinforced, sensor-rich bridge for fleet command.
Crew Habitat Decks	10 M	600 K	Life-supporting residential sections for thousands of crew.
Life Support Complex (Capital Scale)	15 M	700 K	Maintains atmosphere, temperature, and gravity across decks.
Gravity Generator Array	8 M	300 K	Network creating stable artificial gravity shipwide.
Docking Bay (Auxiliary)	12 M	400 K	Supports smaller craft and cargo operations.
Repair Facility (Automated)	50 M	1.5 M	Full-scale maintenance deck using drones and industrial tools.
Medical Complex (Fleet Grade)	20 M	500 K	Hospital deck with cloning and bacta treatment facilities.
Data Core (Strategic AI)	40 M	300 K	Central AI processing hub controlling logistics and combat systems.
Sensor Array (Deep Space)	15 M	200 K	Scans star systems for ships, anomalies, and subspace activity.

NAME	COST	WEIGHT	DESCRIPTION
Fleet Communications Hub	10 M	150 K	Relays data and commands across entire battle groups.
Fuel Tank Array (Capital Scale)	5 M	800 K	Stores reactor-grade fuel for long-term operations.
Docking Clamps (Heavy Duty)	3 M	100 K	Allows secure mooring of other ships or stations.
Cargo Deck (Expanded Hold)	6 M	500 K	High-volume internal freight area.
Power Distributor Network	7 M	250 K	Directs energy across the ship's critical systems.
Shield Harmonics Regulator	20 M	300 K	Balances multiple overlapping shield generators.
Defensive Drone Swarm Bay	25 M	200 K	Deploys autonomous bots for close-range defense.
Fleet Command Uplink	50 M	400 K	Connects capital ship command to larger strategic networks.
Luxury Quarters Deck	10 M	250 K	Private suites for officers and dignitaries.
Observation Dome	5 M	200 K	Reinforced transparent viewing dome for crew morale or VIPs.
Escape Pod Network	2 M	100 K	Integrated emergency evacuation pods for thousands.
Terraformer Module (Planetary)	250 M	5 M	Installs atmospheric alteration systems aboard a capital ship.
Stellar Lance (Superweapon)	500 M	10 M	

Character Armor

NAME	COST	WEIGHT	DESCRIPTION
Cloth Vest	50	2	Light protective garment offering minimal energy resistance.
Padded Flightsuit	100	4	Standard pilot's suit with limited impact protection.
Armored Flightsuit	250	6	Reinforced version for combat pilots and security officers.
Ballistic Jacket	150	5	Civilian armor providing good slug resistance, poor energy defense.
Combat Vest	300	8	Modular chest rig with light plating and ammo mounts.
Tactical Armor	600	12	Full-coverage armor for planetary troops; reliable and common.

NAME	COST	WEIGHT	DESCRIPTION
Recon Armor	800	10	Lightweight, stealth-optimized armor with sensor-dampening mesh.
Marine Armor	1.2 K	15	Sealed armor for vacuum or underwater operations.
Heavy Combat Armor	2 K	22	Thick plates and servo assists for shock troops.
Powered Combat Suit	4 K	35	Strength-augmenting frame; boosts mobility and endurance.
Assault Exosuit	7 K	55	Full-powered shell with integrated HUD and micro-thrusters.
Spec-Ops Stealth Suit	5 K	20	Adaptive camouflage layers; nearly invisible to optics.
Vacuum Suit	400	10	Basic sealed space suit with limited thruster pack.
Bounty Hunter Armor	6 K	40	Custom composite armor with integrated targeting systems.
Reflec Suit	3 K	8	Reflective fiber armor reducing energy-weapon absorption.
Ceramic Plate Armor	1 K	20	Standard issue for planetary garrisons; durable and cheap.
Field Commander Armor	8 K	35	Ornate powered armor with comms and sensor uplinks.
Sniper's Ghille Suit	600	8	Sensor-dampening cloak with chameleon fibers.
Anti-Radiation Suit	700	14	For contaminated or reactor environments; limited mobility.
Security Armor	900	18	Common among station guards; moderate energy and kinetic defense.
Shock Trooper Armor	2.5 K	25	Reinforced armor with internal damping fields.
Energy Shield Belt	3 K	5	Generates short-duration deflector bubble; rechargeable.
Dual-Layer Shield Belt	5 K	8	Improved generator sustaining multiple hits before failure.
Holo-Cloak	4 K	6	Projects light-bending field for disguise and cover.
Deflector Harness	6 K	15	Back-mounted field emitter giving sustained partial protection.
Force-Reactive Armor	10 K	20	Uses localized energy fields to dissipate high-velocity impacts.
Experimental Nanoweave Suit	15 K	10	Self-healing armor of woven nanofibers; rare and valuable.
