

MODERN AIR FORCE ONE

MAP PACK

Main Deck

There are three entrances on the main deck, one for the President, one for the President's staff, and one for everyone else (typically guests & press).

The press occupy the back of the main deck. Staff occupy the middle. Typically press and guests are not allowed into the staff areas.

When landed the luggage and other cargo is off/on loaded on cargo ramps to the Cargo Deck.

VTT Settings: (each unit is 70 pixels)
Page Size (Landed): 70 units wide by 27 units high
Page Size (Flying): 70 units wide by 16 units high
Scale: 1 unit = 1 m (or 3 ft.)
Grid Size: 1 units

Top Deck

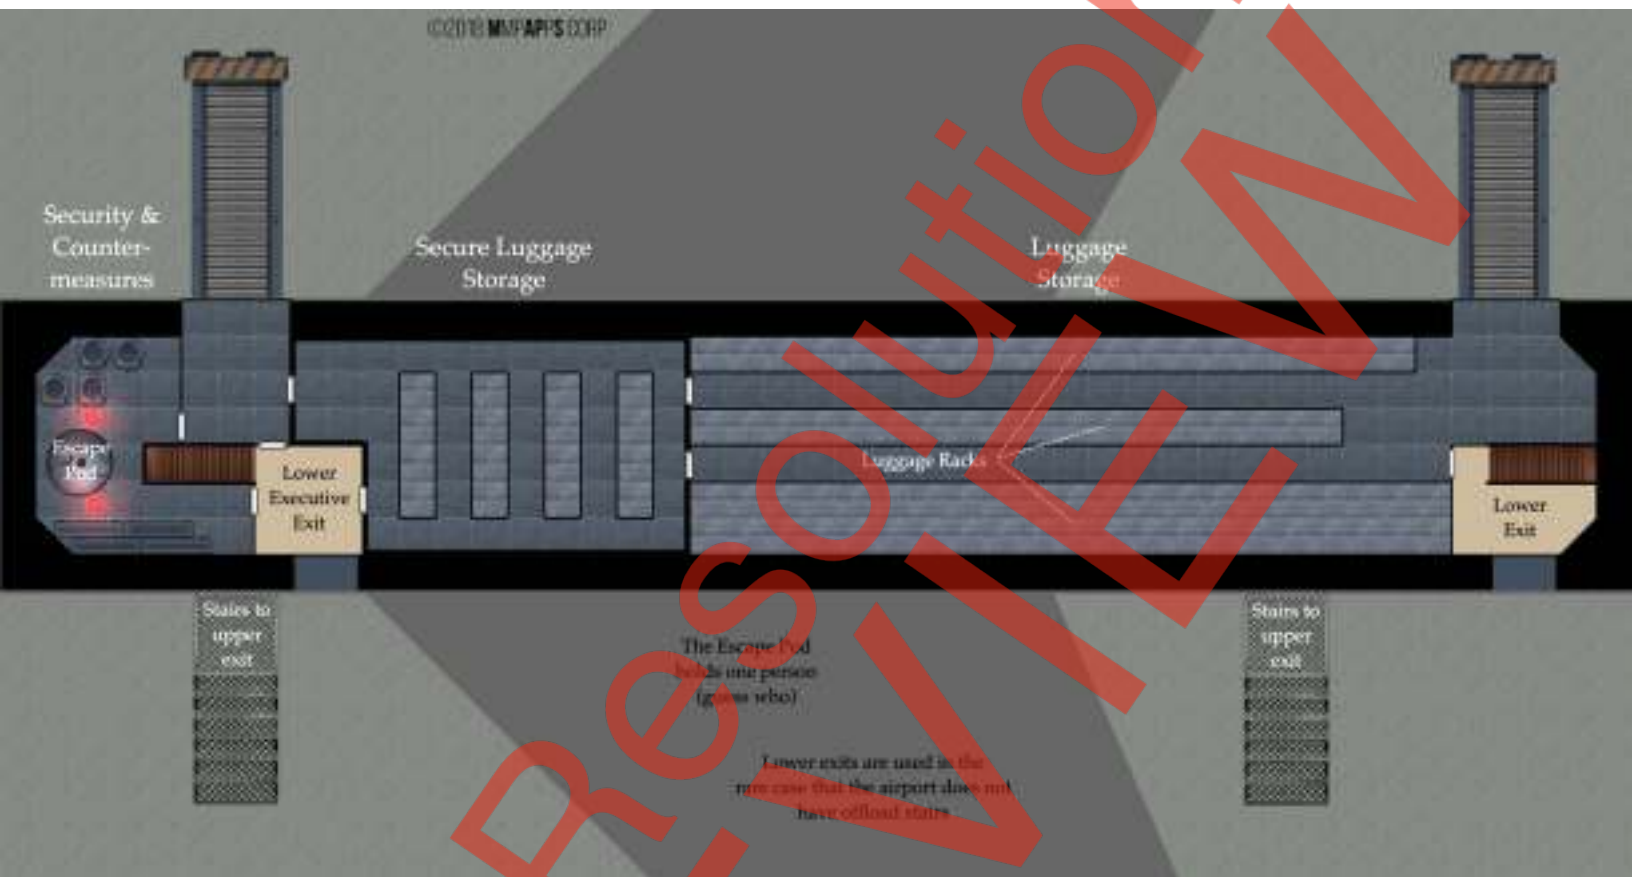

The Top Deck is for the crew responsible for the operation of the aircraft and the complex communications operations.

Since aviation laws have strict rules about pilot rest periods, AF1 will carry multiple crew members for each station that will spend off-duty (rest) periods in the lounge or sleeping quarters.

VTT Settings: (each unit is 70 pixels)
Page Size (Landed and Flying): 20 units wide by 10 units high
Scale: 1 unit = 1 m (or 3 ft.)
Grid Size: 1 units

Cargo Deck

The lower exits have built-in stairs and are used when AF1 lands at an airport that is not equipped with offload stairs.

Luggage is partitioned into two sections, normal and secure. The secure luggage storage is for President and executive staff. The normal luggage storage section is actually no less secure (in a security sense) but is for luggage of press, guests, crew and non-executive staff.

Historical Note: In reality there is no evidence that AF1 has an escape pod. But we included it just in case.

VTT Settings: (each unit is 70 pixels)

Page Size (Landed): 45 units wide by 24 units high

Page Size (Flying): 45 units wide by 12 units high

Scale: 1 unit = 1 m (or 3 ft.)

Grid Size: 1 units

For each location, maps are provided for:

- With grid and without grid
- Landed and in-flight

This set includes the following files:
