

SCIENCE FICTION MODULAR GARRISON

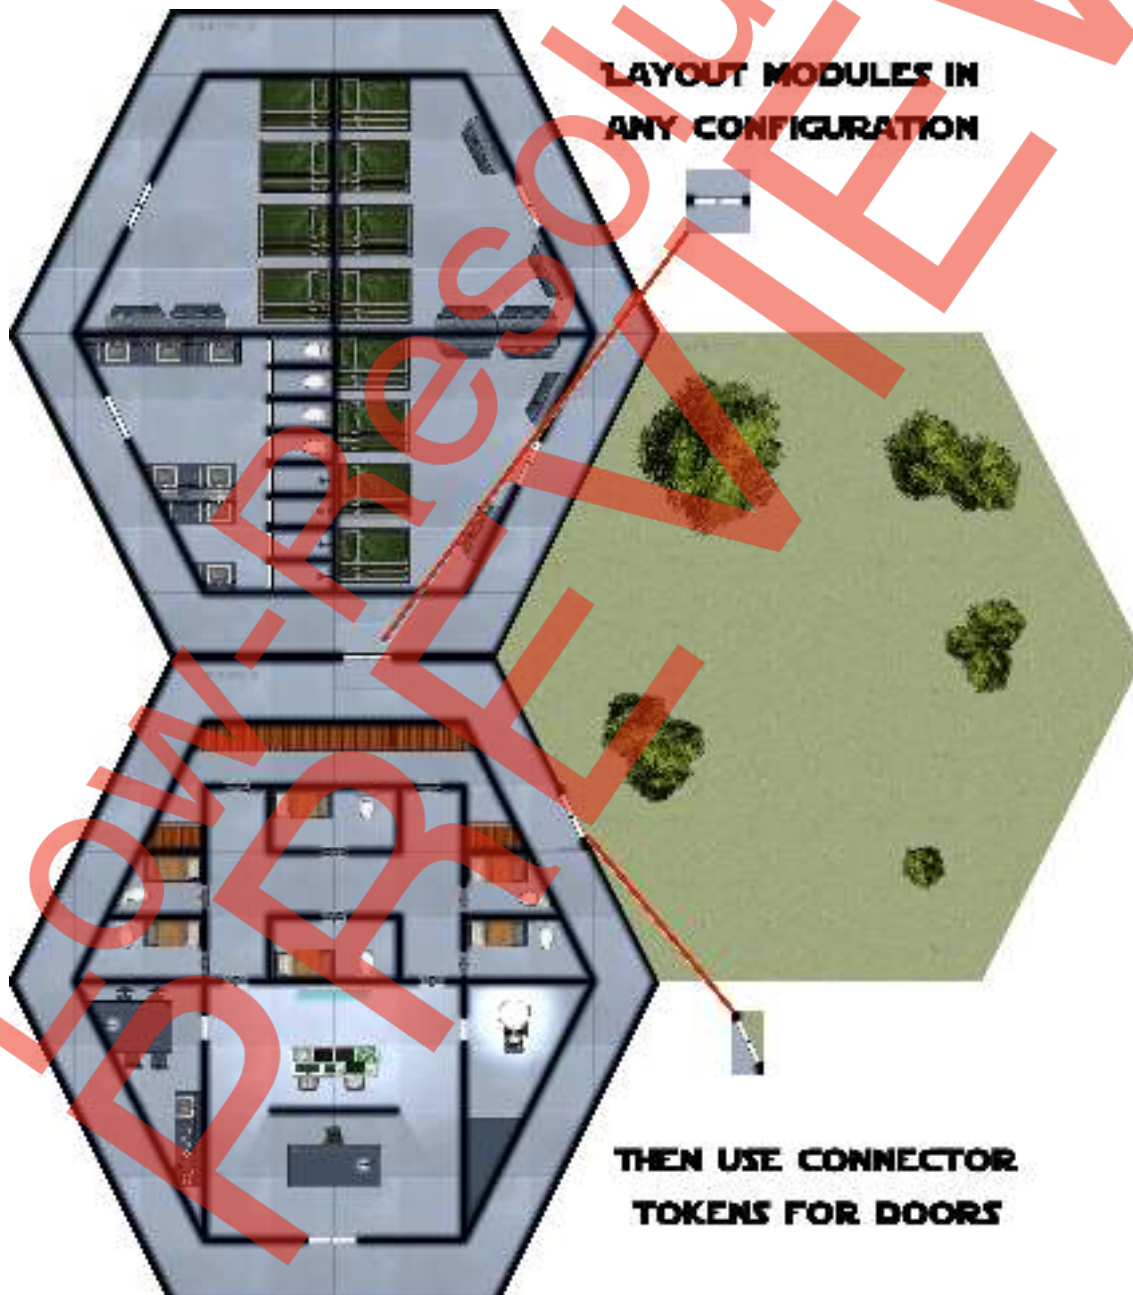

MAP PACK

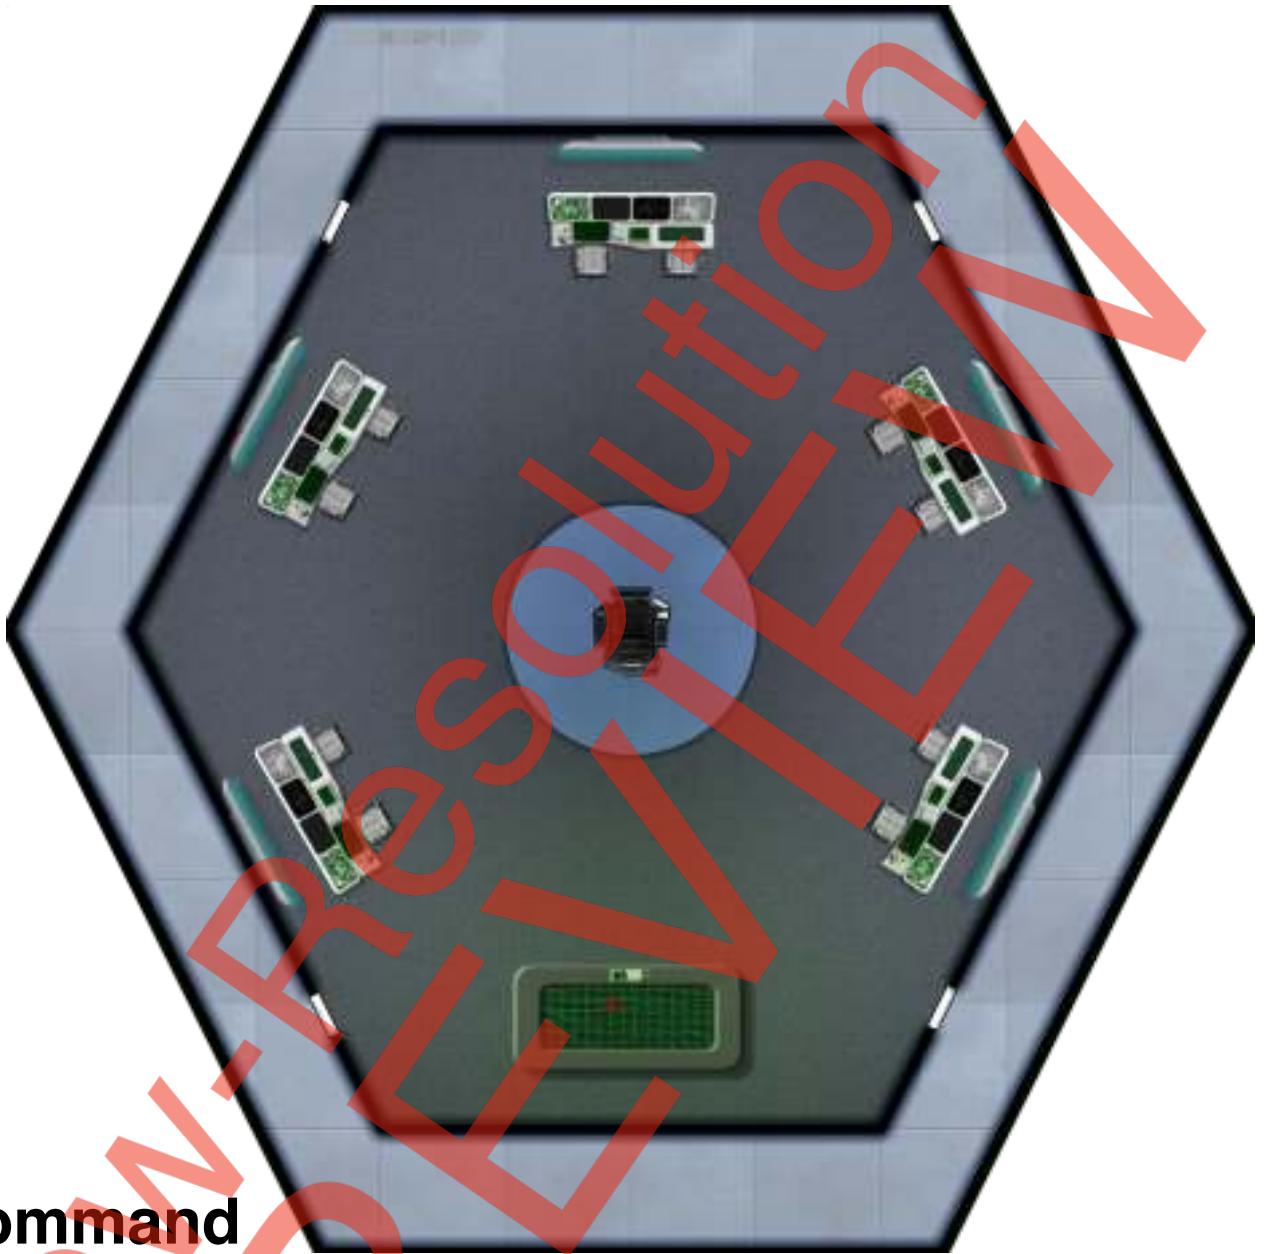

About these maps

When the galactic empire needs to deploy a longer term larger garrison they use a modular system of hexagonal sections that can fit together in any honeycomb pattern to suit their needs.

These modular bases can be configured in countless ways. Environment maps are provided for deployment on desert, water, rocky, arctic, and grassland.

Simply layout to modules you want in any configuration. Use the connection tokens when you want a door or passthrough between adjacent modules.

Command Module

Control of the garrison happens here.
